

CONTENTS OF NEXT ISSUE

PMM Vol. 31, No. 3, 1967

- V. A. LEVIN and G. G. CHERNYI : Asymptotic laws of behavior of detonation waves
- F. A. SLOBODKINA : Stability of quasi-one-dimensional magneto-hydrodynamic flows
- F. L. CHERNOUS'KO : Rotational motions of a rigid body with a cavity filled with liquid
- V. I. KIRGETOV : On the motion of guided mechanical systems with conditional constraints (servo-constraints)
- I. Ia. KATS : On stability in first approximation of systems with random lag
- V. I. ZHUKOVSKII : On conditional stability in the critical case of several pairs of purely imaginary roots
- N. N. KRASOVSKII and Iu. M. REPIN : On the problem of coming to rest of a linear system
- R. V. GOL'DSHTEIN : On surface waves in joined elastic materials and their relation to the propagation of cracks along the juncture line
- G. P. CHEREPANOV : On propagation of cracks in a continuous medium
- V. A. BORODIN : On the calculation of zeros of integer functions with the aid of series in problems of mechanics
- I. N. KUZNETSOV : Reciprocity relations for differential operators in the theory of elasticity
- I. V. SIMEONOV : A method of solution of systems of nonlinear equations of potential type
- I. N. MIL'SHTEIN and Iu. M. REPIN : On the mean square stability of a system of stochastic differential equations
- I. V. STOIANOV : On stabilization of steady motions of a nonlinear control system in the critical case of a double zero root
- I. O. VAN VYONG : On stability of motion in a critical case
- I. I. BONDARENKO and Iu. M. FILIMONOV : On the problem of stabilization of a nonlinear system
- I. A. SAMSONOV : On the problem of the minimum of a functional in investigating the stability of motion of a body with a liquid filler
- I. B. NEVEL'SON : On the behavior of a linear system under small random disturbances of its parameters

- A. M. KOVALEV and Iu. M. KOVALEV ; On the quadratic integral of the equations of motion of a body with a fixed point
- M. I. FEIGIN ; Sliding regime in dynamical systems with impact type interactions
- L. V. ERSHOV and D. D. IVLEV ; On conditions of quasi-brittle fracture
- A. N. BULYGIN and E. V. KUVSHINSKII ; Plane deformation in the asymmetric theory of elasticity
- ANGELO MIELE ; Simplified approach to the problem of constructing an optimum transverse contour
- I. M. RUTKEVICH ; The electromagnetic field in a compressed strip
- A. B. VATAZHIN ; The determination of parameters of subsonic flow in a channel beyond the zone of axial nonhomogeneity of weak perturbing forces and heat sources
- G. A. GRINBERG and O. M. KONTOROVICH ; On the character of layers near the wall and their covering in magneto-hydrodynamic flow of a conducting fluid along a channel of rectangular cross section
- V. I. IAKUSHIN ; On the spectrum of small disturbances of the motion of a fluid between rotating spherical surfaces
- G. Z. GERSHUNI, E. M. ZHUKHOVITSKII and R. N. RUDAKOV ; On the spectrum of thermal disturbances in flows of an incompressible liquid
- Iu. K. BRATUKHIN and L. N. MAURIN ; Thermocapillar convection of a fluid filling a half-space
- P. P. MOSOLOV and V. P. MIASNIKOV ; On qualitative singularities of flows of a viscoplastic medium in tubes
- DAN G. IONESCU ; On the general solution of the equations of axisymmetric motions of viscous fluids
- E. G. SHIFRIN ; On extremum values of the entropy on the critical current line
