

## CONTENTS OF NEXT ISSUE

PMM Vol. 31, No. 6, 1967

- V. L. BERDICHEVSKII and L. I. SEDOV : Dynamic theory of continuously distributed dislocations. Connection with the theory of plasticity
- B. L. ABRAMIAN and N. Kh. ARUTIUNIAN : On some contact problems for a composite half-space
- S. N. KRUZHKOVA : On some problems with unknown boundary for the equation of heat conduction
- R. Z. KHAS'MINSKII : On the stability in first approximation for stochastic systems
- G. D. SEVOST'YANOV : Plane transonic gas flows with a normal shock wave
- O. S. RYZHOV and E. D. THERENT'EV : On perturbations which are connected with the creation of lift acting on a body in transonic flow of a dissipative gas
- A. L. GONOR : Supersonic flow past delta wings with ribs on the surface
- A. S. MONIN : Equations of turbulent motion
- V. R. KUZNETSOV : On the probability density of the difference of velocities at two distinct points of a homogeneous isotropic turbulent flow
- NGUEN VAN D'EP : On the stability of Couette flow of the anomalous Grad fluid
- Iu. P. EMETS : The hodograph method in electrodynamics of continuous nonlinearly conducting media
- S. A. KAGANOV : On the stability of stationary solutions in the theory of thermal explosion
- S. I. GORSHIN : On the principle of reduction
- M. F. DIMENTBERG : Determination of statistical characteristics of a linear dynamic system on the basis of measurement of its motion
- A. A. KARYMOV and T. V. KHARITONOVA : Influence of external perturbing moments on the dynamics of a uniaxial system of orientation of a spacecraft with one flywheel
- V. V. BELETSKII : Boundaries of libration of three-axial satellite in the gravitational field
- N. N. SEREBRIAKOVA : On periodic solutions of dynamic systems of second-order which are close to being piece-wise analytic
- M. V. MIRONOV : Application of the Hamilton-Ostrogradskii principle in problems of the theory of nonlinear oscillations
- V. M. ALEKSANDROV : On approximate solution of some integral equations of the theory of elasticity and mathematical physics
- M. I. GUSEIN-ZADE : On some properties of the state of stress of a thin elastic layer
- E. I. GRIGOLIUK and V. M. TOLKACHEV : On the analysis of cylindrical shells subjected to line loads
