

CONTENTS OF NEXT ISSUE

PMM Vol. 33, №1, 1969

- F. S. VLADIMIROV : Collision of jets emerging from channels with parallel walls
- V. M. KROL' and I. V. NEMCHINOV : Self-similar motions of a gas heated by radiation behind the shock wave front which initiates absorption
- Iu. A. BUEVICH : Statistical mechanics of gas mixtures. Quasi-isotropic model
- I. M. RUTKEVICH : Some general properties of the equations of dynamics of a visco-elastic incompressible fluid
- V. A. BABESHKO : On the integral equation of some dynamic contact problem of the theory of elasticity and mathematical physics
- V. M. ALEKSANDROV : Asymptotic solution of a contact problem for a thin elastic layer
- I. I. VOROVICH and G. A. KOSUSHKIN : On the solution of the general problem for the elastic closed cylindrical shell in nonlinear formulation
- K. Sh. KHODZHAEV : Integral criterion of stability for systems with quasi-cyclic coordinates and energy relations for vibrations of conductors with currents
- F. L. CHERNOUS'KO : On optimization of the process of observation
- A. P. MARKEEV : On stability of triangular points of libration in the circular bounded problem of three bodies
- S. G. KREIN and NGO ZUI KAN : The problem of small motions of a body with a cavity, partially filled with a viscous fluid
- N. V. SLONOVSKII : On thermoelastic stability in the presence of sliding friction
- S. Ia. STEPANOV : On stationary motions of a satellite-gyrost
- A. I. KALANDIA : Remarks on a singularity of elastic solutions in the vicinity of corners
- A. V. BELOKON' : The contact problem of the interaction of an elastic disk with two different rigid dies
- A. D. CHERNYSHOV : On the propagation of shock waves in an elasto-plastic medium
- L. N. MAURIN : On the equilibrium of a liquid membrane on a rotating sphere
- A. P. BYRKIN : On an exact solution of the Navier-Stokes equations for a compressible gas
- E. G. SHIFRIN : On the convexity of a shock wave on the subsonic portion in plane flow
- G. M. SHEFTER : On the influence of viscosity and thermal conductivity on the propagation of sound impulses in a nonhomogeneous moving medium
- A. F. SIDOROV and O. B. KHAIRULLINA : On three-dimensional propagating waves in a barotropic gas
- Ia. G. SAPUNKOV : Motion of a heat-conducting gas under the action of thermally insulated expanding piston
- G. A. TIRSKII : Calculation of effective coefficients of diffusion in a laminar disassociated multicomponent boundary layer
