

CONTENTS OF NEXT ISSUE

PMM Vol. 33, No. 2, 1969

- V. V. NOVOZHILOV: On the necessary and sufficient criterion of brittle strength
- Iu. A. BERMAN and R. F. NAGAEV: On diffusional mass exchange in a stationary layer of a granular medium
- V. V. GOGOSOV, V. A. POLIANSKII, I. P. SEMENOVA and A. E. IAKUBENKO: One-dimensional flows in electrohydrodynamics.
- D. P. KOUZOV: Diffraction of a cylindrical hydroacoustic wave at the interface of two semi-infinite plates
- G. S. SHELEMENT'EV: On a problem of correction of motion
- E. DAHLBERG: On some change in form of the criterion of instability of motion
- G. A. GRINBERG: On the solution of problems of diffusional type for expanding or compressing regions
- V. S. NUSTROV: On periodic solutions of nonlinear autonomous systems of a certain type
- V. I. FEODOS'EV: Axisymmetric elastic problem of a spherical shell
- Iu. N. KUZ'MIN: The external problem of Dirichlet for a semi-infinite cylinder
- D. L. BYKOV and V. A. SHACHNEV: On a generalization of a method of elastic solutions
- L. M. KURSHIN and V. L. PRISEKIN: Equilibrium states of a cylindrical shell with initial deflections in the presence of compression
- A. B. IVANOV: The linear problem of torsional vibrations of an elastically constrained rigid sphere in a viscous fluid, bounded by concentric sphere
- U. K. NIGUL: Comparison of results of analysis of transitional wave processes in shells and plates on the basis of the theory of elasticity and approximate theories
- L. A. KOMRAZ: Features of the dynamics of a trigger regulator with electromagnetic connection
- A. G. RAMM: Excitation of natural frequencies of small oscillations when damping is introduced
- I. I. VUL'FSON: On vibrations of systems with parameters, which depend on time
- L. D. AKULENKO: On steady motions in autonomous systems with a perturbed argument
- B. N. SKRIABIN: Qualitative study of an equation of the theory of automatic frequency control in phase
- NGUEN TKHAN' BANG: Optimum problem of terminal control
- O. M. SAPUNKOVA: On the application of the hodograph method to the solution of nonlinear phenomena in a plasma
- L. V. SHURSHALOV: On the problem of strong explosion at the boundary of a half-space, filled with a perfect gas
- O. V. VOINOV, A. M. GOLOVIN and A. G. PETROV: Nonstationary transfer of energy from a radiating sphere into a medium with molecular heat conduction
- G. P. SHINDIAPIN: Effect of viscosity and heat conduction for weak Mach reflection
- B. M. NULLER: On the relation of the generalized orthogonality of P. A. Schiff
- M. E. AVERBUKH and L. E. BORUKHOV: On errors in the book by L. J. Slater "Degenerate hypogeometric functions"
