

## CONTENTS OF NEXT ISSUE

PMM Vol. 33, №5, 1969

- A. P. CHERENKOV: Optimal guaranteed control with single switching
- A. M. VAISMAN and I. A. KUNIN: Boundary value problems in the nonlocal theory of elasticity
- V. V. NOVOZHILOV: On the foundation of the theory of equilibrium cracks in elastic bodies
- N. Kh. ARUTIUNIAN and S. M. MKHITARIAN: Periodic contact problem for a halfplane with elastic cover plates
- B. A. KUDRIAVTSEV and V. Z. PARTON: Dual trigonometric series in problems of cracks and stamps
- L. N. TER-MKRTICH'IAN: Homogeneous solutions of the plane problem of the theory of elasticity for a rectangular region of a Cosserat medium
- G. Z. GERSHUNI and E. M. ZHUKHOVITSKII: On stability of plane-parallel convective motion with respect to spatial disturbances
- G. I. BARENBLATT: Self-similar solutions of the second kind in nonlinear filtration theory
- I. M. ABDURAKHMANOV: On the perturbation of filtration flow by a single fissure
- L. Ia. KOSACHEVSKII and I. A. STROCHKOV: Visco-plastic boundary layer for a power-law velocity distribution along the external boundary
- I. I. SHMULEV: Boundary value problems for model turbulence equations
- E. A. NOVIKOV: Relation between the Lagrangian and the Eulerian description of turbulence
- V. I. KLIATSKIN: On the statistical theory of two-dimensional turbulence
- E. G. SHIFRIN: On the structure of the separated shock wave in flows past a profile
- I. N. LARINA: Rarefied gas flow over a sphere
- B. N. RUMIANTSEV: Collision with an obstacle of a body, containing a viscous liquid
- V. N. RUBANOVSKII and C. Ia. STEPANOV: On Routh's theorem and Chetaev's method for the construction of a Liapunov function from integrals of the equations of motion
- N. N. SEREBRIAKOVA: On periodic solutions of dynamical systems of second order, close to piece-wise Hamiltonian one
- Bl. DOLAPCHIEV: Reduction of Nielsen's equations for nonholonomic mechanical systems to Chaplygin's equations
- E. A. IL'IUSHINA: On a model of a continuous medium taking into account the microstructure
- L. I. RUBINA: On the propagation of weak discontinuities for systems of equations of magnetogasdynamics
- N. V. VALISHVILI and V. B. SILKIN: On equilibrium shapes of a rectangular plate in gas flow
- V. A. BARANENKO and Iu. M. POCHTMAN: Investigation of deformations of elastic membranes with prescribed maximum deflection by the method of dynamic programming
- B. I. SMETANIN: On the wedging of an elastic infinite wedge
- I. T. EFIMOVA and Ia. S. UFLIAND: On a generalization of Fourier's integral theorem and its applications
