

## CONTENTS OF NEXT ISSUE

PMM Vol. 34, №2, 1970

- N. N. KRASOVSKII : On the theory of differential games  
G. K. POZHARITSKII : On the problem of encounter in systems of second-order with impulsive and non-parallel controls  
S. K. PERSIDSKII : On the study of stability of solutions of systems of differential equations  
A. P. MARKEEV : On stability of triangular libration points in the elliptical bounded problem of three bodies  
V. S. MILEVA : An optimal problem of tracking of an artificial satellite with the aid of a gyroscope  
L. M. ZUBOV : The stationary principle of complementary work in the nonlinear theory of elasticity.  
V. M. ALEKSANDROV : On plane contact problems of the theory of elasticity in the presence of adhesion or friction  
L. A. FIL'SHTINSKII : On boundary value problems of the theory of shallow shells  
K. A. LUR'E : On the optimum distribution of the tensor of specific drag of the working substance in a magnetohydrodynamic channel  
I. P. SEMENOVA : Investigation of the influence of a transverse electric field on a one-dimensional electrodynamic flow  
S. N. OVCHINNIKOVA : Stability of Couette flow in the case of a wide gap between rotating cylinders  
Iu. A. BUEVICH : Euler approximation for collisionless semi-dispersive suspensions  
R. I. NIGMATULIN and V. N. NIKOLAEVSKII : Diffusion of a vortex and conservation of momentum in dynamics of non-polar fluids  
E. D. THERENT'EV : On the lift and side forces acting on a body in transonic flow  
M. Sh. GITERMAN and SHTEINBERG : Criteria of formation of free convection in a compressible viscous and heat-conducting fluid  
Ts. A. GOTLIB and V. K. PROKOPOV : Equations of equilibrium of a plate of variable thickness  
B. M. NULLER : Contact problem for an elastic infinite cone  
N. A. BELOVA and Ia. S. UFLIAND : On torsion of a truncated hyperboloid  
V. L. VOROB'EV and G. Ia. POPOV : Contact problem for an elastic half-plane and a semi-infinite elastic bar adhering to it  
V. S. PROTSENKO and V. L. RVACHEV : On a method of constructing approximate solutions of mixed axisymmetric problem of the theory of elasticity  
B. I. SMETANIN : Two cracks in a layer of finite thickness  
A. M. PROTSENKO : Convergence of the problem of limiting equilibrium  
D. A. MAMATKAZIN : Programming of trajectories of a cosmic flight vehicle  
Iu. N. BIBIKOV and A. M. LESTEV : On auto-oscillations of gyroscopic stabilizers
