

CONTENTS OF NEXT ISSUE

PMM Vol. 34, №4, 1970

- E. G. AL'BREKHT : On the approach of quasilinear objects
- V. B. KOLMANOVSKII and V. R. NOSOV : On stability of nonlinear equations of the neutral type of first order
- B. A. SMOL'NIKOV and M. V. STEPANOVA : Motion of an asymmetric gyrostat with self-excitation
- G. Ia. POPOV : On integral equations of the theory of elasticity with difference and sum kernels
- B. M. NULLER : Contact problems for an elastic semi-infinite cylinder
- L. M. ZUBOV : Buckling of plates of neo-Hookean material with an affine initial deformation
- V. M. ALEKSANDROV and V. A. KUCHEROV : On the method of orthogonal polynomials in plane mixed problems of the theory of elasticity
- K. Sh. KHODZHAEV : Nonlinear problems of deformation of elastic bodies by a magnetic field
- A. B. VATAZHIN : Propagation of a shock wave in a channel in the presence of interaction of a gas compressed in it and a nonhomogeneous magnetic field
- G. I. BARENBLATT and G. I. SIVASHINSKII : Self-similar solution of the second kind in the problem of propagation of strong shock waves
- G. M. ARUTIUNIAN : On diffraction of shock waves
- G. Z. GERSHUNI, E. M. ZHUKHOVITSKII and A. A. IAKIMOV : On stability of steady convective motion generated by internal heat sources
- I. V. NEMCHINOV : On averaged equations of radiation transfer and their application in solving problems of gas dynamics
- Iu. A. BUEVICH and Iu. P. GUPALO : On discontinuity surfaces in dispersive systems
- T. F. IVANOV : On self-similar solutions of problems of theory of filtration and heat transfer in heterogeneous media
- V. G. PAVLOV : On the invariance of an optimal process with distributed parameters
- N. V. STOIANOV : On stabilization of a nonlinear control system in the critical case of zero and pure imaginary roots
- I. ILIEV : On linear integrals of a holonomic mechanical system
- I. M. BELEN'KII : On the theory of Hamiltonian systems
- I. O. OSIPOV : On the theory of Rayleigh waves in an anisotropic half-space
- I. G. MITKEVICH : On a contact problem for a viscoelastic half-plane
- E. M. MOROZOV : On the correspondence between the energy criterion of fracture and the mathematical modelling of phenomena of deformation at the tip of cuts or cracks
