CONTENTS OF NEXT ISSUE

PMM Vol. 36, №5, 1972

N. Kh. ARUTIUNIAN and S. M. MKHITARIAN : Some contact problems for a half-space, reinforced by elastic coversheets

V. L. BERDICHEVSKII : Variational methods for constructing models of shells

A. P. MARKEEV : On normalization of a Hamiltonian system of linear differential equations with periodic coefficients

A. Z. AVERBUKH and E. V. VENITSIANOV : Stationary solutions of a dispersive system of nonlinear waves

A. S. OZIRANER : On stability of equilibrium positions of a rigid body with a cavity containing a liquid

A. I. SOLIANIN and F. L. CHERNOUS'KO : Approximate synthesis method of optimal control of a system, subjected to random disturbances

Iu. S. FEDOSENKO and M. I. FEIGIN : On the theory of sliding regime in dynamical systems with collisions.

V. V. GOGOSOV and V. A. POLIANSKII : Structure of electro-hydrodynamic shock waves

I. P. SEMENOVA and A. E. IAKUBENKO : One-dimensional electro-hydrodynamic flows with shock waves

V. I. GRABOVSKII : One-dimensional electro-gasdynamic flow with shock waves for a small parameter of electro-hydrodynamic interaction

V. S. GALKIN, M. N. KOGAN and O. G. FRIDLENDER : Flow past a strongly heated sphere of a gas with small Reynolds numbers

V. P. PLEVAKO : On the possibility of using harmonic functions in solving problems of the theory of elasticity for anisotropic media

L. V. PETUKHOV and V. A. TROITSKII : Some optimal problems of the theory of longitudinal vibrations of bars

Iu. A. AMENZADE : Impression of a stamp into a half-plane with inclusions

A. P. MACHIL'SKII : Integrals of relative motion of a system of particles with identical mass

P. B. GUSIATNIKOV : On the question of information of players in a differential game

V. M. ZAVARYKIN and B. I. SHAKHTARIN : Domains of asymptotic stability of Liénard's equation

I. O. OSIPOV : On wave fields and sharp cornered egdes at wave fronts in an anisotropic medium caused by a point source

S. I. ANISIMOV and O. M. SPINER : Motion of a gas, close to an ideal one, due to a strong point explosion

A. A. ALEKSEEV and B. M. STRUNIN : Characteristics of trajectories of a field generated by randomly distributed sources

A. A. OREL : Remark on variational problems of nearsonic gas flows

V. A. BABESHKO and V. N. BERKOVICH: On the theory of mixed problems for a three-dimensional wedge

V. I. FABRIKANT : Exterior axially-symmetric mixed problem for a transversely isotropic half-space

K. Sh. KHODZHAEV and I. Z. SHTILERMAN : On a boundary value problem of nonlinear magnetoelasticity

D. D. IVLEV : On general relations of the theory of ideal plasticity and statics of granular [cohesionless] media
