

CONTENTS OF NEXT ISSUE

PMM Vol. 37, №5, 1973

- I. Ia. KATS and A. B. KURZHANSKII : On problems of optimal observation
S. I. TARLINSKII : On sufficient conditions of approach in a differential game
I. Ia. KRICHEVSKII and G. M. ULANOV : On a generalization of the theory of accumulation of deviations
A. G. TSYPKIN : Study of polarized and magnetized continuous media with the aid of a variational equation
I. E. TARAPOV : Simple waves in non-conducting magnetized medium
V. I. GRABOVSKII : Plane electro-hydrodynamic flow with reverse current
O. A. SINKEVICH : Waves of ionization and recombination in a weakly ionized magnetized plasma
A. G. KULIKOVSKII and M. E. EGLIT : Two-dimensional problem on the motion of a snow avalanche along an incline with smoothly changing properties
O. M. KISELEV and L. M. KOTLIAR : On the problem of motion of a heavy liquid with two free surfaces
A. I. BUNIMOVICH and A. B. DUBINSKII : Generalized loss of similitude for flow past bodies under the conditions of the law of localization
A. I. KORNEEV : Application of similitude hypotheses in solving the problem of the generalization of homogeneous turbulence
Iu. A. BUEVICH and V. G. MARKOV : Continuum mechanics of monodisperse suspensions. Integral and differential conservation laws
A. G. ALENITSYN : Rayleigh waves in a nonhomogeneous layer resting on a half-space
A. A. BURENIN, NGUEN KHIU TKHAN' and A. D. CHERNYSHOV : On propagation of shock waves in an elastic medium for plane finite deformation
V. P. PLEVAKO : Equilibrium of a nonhomogeneous half-plane under the action of surface tractions
B. A. SHOIKHET : On asymptotically exact equations of thin plates with complex structure.
I. G. GORIACHEVA : Contact problem of rolling of a visco-elastic cylinder on a foundation of like material
I. I. VOROVICH and N. I. MINAKOVA : Equations of axisymmetric state of stress and strain of a non-shallow spherical shell made of a non-linear elastic material for large deformations
B. L. BERDICHEVSKII : An energetic inequality in the theory of plate bending
A. E. PURO : Application of Hankel transform for the solution of axisymmetric problems for a power dependence of the modulus of elasticity on depth
E. M. KOROLEVA : Stability of cylindrical shells of oval cross section for a bending state of stress
E. M. ZVERIAEV : Influence of the sign of curvature of a shell on the character of the state of stress
