

CONTENTS OF NEXT ISSUE

PMM Vol. 38, №1, 1974

- A. B. KURZHANSKII : Optimal coupled systems of control and observation
- G. K. POZHARITSKII : Generalized problem of impulsive pursuit of a point with bounded force
- N. SATIMOV : On the problem of pursuit in nonlinear differential games
- V. G. TREIVAS : On estimating some indices of quality in linear stationary control systems
- A. P. MARKEEV and A. G. SOKOL'SKII : Numerical investigation of stability of Lagrange solutions of elliptic limited problems of three bodies
- G. G. KHAZINA : Some problems of stability in the presence of resonances
- Iu. I. NEIMARK and N. A. FUFAYEV : Dynamics of asynchronous machines with a rotor of "squirrel cage" type
- V. N. DANILOV, S. A. PEGOV and V. A. SYROVOI : Formation of a tube-like ray of charged particles during emission with zero velocity and zero voltage
- M. M. VASIL'EV : On asymptotic behavior of velocity and forces acting on a body in a stationary flow of a viscous liquid
- O. S. RYZHOV and E. D. TERENT'EV : On hypersonic flow past an airfoil
- G. P. SHINDIAPIN : Nonregular interaction of weak shock waves of different intensities
- A. I. KUZNETSOV, V. F. NELEPIN and K. P. STANIUKOVICH : Propagation of sound waves in a medium located in the gravity field
- L. A. OSTROVSKII and E. N. PELINOVSKII : On approximate equations for waves in media with small nonlinearity and dispersion
- N. M. BORODACHEV and L. A. GALIN : Contact problem for a stamp with a base in the form of a narrow rectangle
- V. N. ZAKORKO : Axisymmetric deformation of an elastic layer with a circular curve separating the boundary conditions at the two edges
- V. S. NIKISHIN and G. S. SHAPIRO : On local axisymmetric compression of an elastic layer weakened by an annular or circular crack
- G. T. ZHORZHOLIANI and A. I. KALANDIA : Influence of a stringer on the stress distribution in the vicinity of an opening
- O. I. IVANISHCHEVA and V. A. MINAEV : On the state of stress and strain of stochastically nonhomogeneous elastic bodies
- N. N. GORBANEV : On the comparison of stationary and quasi-stationary flows of an ideal fluid
- V. I. NAIDENOV : Steady flow of a viscous incompressible fluid with temperature-dependent viscosity
- A. I. SUSLOV : On the separation of the boundary layer during injection
- T. D. DZHURAEV : On singlevalued solution of the fundamental boundary value problem in the theory of the thermal boundary layer
- Iu. A. AMENZADE : Indentation of a stamp into a half-plane with circular inclusions
- G. Ia. POPOV : On the solution of problems of the theory of elasticity by the method of factorization
- M. I. ROZOVSKII : Operator method of studying the deformation of a hollow sphere with different creep laws
- E. I. GOL'DENGERSEL' : On the Euler stability of a viscoelastic rod
