

## CONTENTS OF NEXT ISSUE

PMM Vol. 38, № 2, 1974

- V. V. STRUMINSKII : Influence of diffusion rate on the flow of gas mixtures
- A. G. CHENTSOV : On game problems of approach-evasion
- V. G. DEMIN and F. I. KISELEV : On periodic motions of a rigid body in a central Newtonian field
- D. R. MERKIN : On the problem of admissibility of application of precessional equations of gyroscopic systems
- L. M. MARKHASHOV : Invariance of multi-dimensional systems with one resonance relation
- A. Ia. SAVCHENKO : On stability of motions of conservative mechanical systems with continually acting disturbances
- V. M. LAKHADANOV : On the influence of structure of forces on the stability of motion
- E. D. TERENT'EV : Structure of shock waves in hypersonic flows
- I. B. GAVRILUSHKIN and A. F. SIDOROV : On a class of solutions of the nonlinear equation for the velocity potential
- V. S. GALKIN and O. G. FRIDLENDER : On forces on a body in a gas caused by Barnett stresses
- L. A. ABRAMOV and L. S. AL'PEROVICH : Convection in chemically active media
- Iu. A. KUZNETSOV and S. F. MOROZOV : On necessary optimality conditions in problems of control by means of transfer processes
- Iu. A. BUEVICH : Continuum mechanics of multi-dispersive suspensions. On properties of a suspension of spherical dipoles in an external field
- G. Ia. POPOV and L. Ia. TIKHONENKO : Plane problem on the contact of a semi-infinite beam with an elastic wedge
- E. Kh. GRIGORIAN : On a dynamic contact problem for a half-plane reinforced by an elastic cover plate of finite length
- V. A. KUCHEROV : The method of orthogonal polynomials in plane antisymmetric mixed problems of the theory of elasticity with two contact regions
- I. I. VOROVICH, L. P. LEBEDEV and Sh. M. SHLAFMAN : On some direct methods and existence of solution in the nonlinear theory of elastic non-shallow shells of revolution
- L. A. FIL'SHTINSKII : Theory of two-dimensional potential field in piecewise heterogeneous isotropic regular media
- A. G. FOKIN and T. D. SHERMERGOR : Correlation functions of the elastic field of multi-phase polycrystals
- E. A. GREBENNIKOV and M. N. KIOSA : On the nonreducibility of the equations of the limited circular problem of three bodies of the Steckel type
- Iu. M. -L. KOSTIUKOVSKII : On stable motions
- V. Ia. RUDIAK : On the question of studying exact solutions of a system of equations of kinetic moments
- V. N. BERKOVICH : Some contact problems for a three-dimensional wedge with a finite number of contact regions
- L. M. KURSHIN and L. I. SHKUTIN : Supplement to "On the problem of elastic stability of a locally-loaded cylindrical shell"
- Iu. I. SOLOV'EV : Solution of the axisymmetric problem of the theory of elasticity for transversely isotropic bodies with the aid of generalized and analytic functions
