

CONTENTS OF NEXT ISSUE

PMM Vol. 39, № 2, 1975

- G. K. POZHARITSKII : Game problem of impulsive rigid encounter in a positional field of attraction with the enemy who can realize limited thrust
- A. A. MELIKIAN : On optimum selection of error intervals in differential games of approach
- S. T. ZAVALISHCHIN and V. V. USHAKOV : The problem of encounter in the case that the guiding forces are related to complete impulses
- A. F. KLEIMENOV : The problem of conflicting control
- A. S. BRATUS' : Method of approximate solution of the equation of Bellman for problems of optimum control of a system subjected to random disturbances
- V. V. ALEKSANDROV and G. L. STENCHIKOV : The influence of radiation on gas flow from a strong explosion for large times
- M. Iu. KOZMANOV : Method of solution of some boundary value problems for a hyperbolic system of quasilinear equations of first order with two variables
- L. V. PETUKHOV and V. A. TROITSKII : Variational problems of optimization for equations of the hyperbolic type in the presence of boundary controls
- P. A. VEL'MISOV and S. V. FAL'KOVICH : Unsteady gas flow in Laval nozzles with local supersonic regions
- Z. N. DOBROVOL'SKAIA : On the hodograph method for axisymmetric transonic gas flow
- V. N. DIESPEROV and Iu. B. LIFSHITS : On drag of bodies of revolution in transonic flow
- Ia. I. SEKERZH-ZEN'KOVICH : On composite steady capillary-gravitational waves with finite amplitude
- V. S. BERMAN and Iu. S. RIAZANTSEV : Asymptotic analysis of stationary propagation of the front of parallel exothermal reaction
- Iu. P. GUPALO and G. P. CHEREPANOV : Pseudo-combustion in the presence of an obstacle
- V. M. ALEKSANDROV : On a method of reducing dual integral equations and dual series equations to infinite algebraic systems
- N. N. ROGACHEVA : Method of decomposition of the state of stress in shells of negative curvature with asymptotic edges
- G. N. CHERNYSHEV : Asymptotic method of investigating short wave shell vibrations
- B. A. KUDRIAVTSEV, V. Z. PARTON and V. I. RAKITIN : Fracture mechanics of piezoelectric materials. Axisymmetric crack in the boundary with a conductor
- A. V. MEZENTSEV : On the problem of evasion with constraints of different types
- A. G. SOKOL'SKII : On stability of Lagrange solutions of the constraint problem of three bodies for the critical relation between the masses
- E. Ia. ZHURAVLEVA and V. V. STRYGIN : Remarks on the asymptotic behavior of small auto-oscillations of systems of differential equations
- V. N. NIKOLAEVSKII : The stress tensor and averaging in the continuum mechanics
- N. V. DERENDIAEV : On characteristic functionals of the random velocity field of screw motions of a viscous fluid
- M. G. SELEZNEV : Excitation of waves in a two-layered medium by a vibrating die
