

CONTENTS OF NEXT ISSUE

PMM Vol. 40, № 2, 1976

- N. N. KRASOVSKII: On guidance in the presence of incomplete information.
- E. G. AL'BREKHT and M. I. LOGINOV: On continuous dependence of a linear game of approach on a parameter
- V. D. BATUKHTIN: On a relationship between conditions of solvability of differential games
- V. I. MAKSIMOV: Linear differential game of approach with a functional goal
- A. I. KOBRIN, Iu. G. MARTYNYENKO and I. V. NOVOZHILOV: On precessional equations of gyroscopic systems
- R. A. LEONOV: The second method of Liapunov in the theory of phase synchronization
- L. HATVANYI: On absence of asymptotic stability with respect to a part of the variables
Correction in the article of L. Hatvanyi; On certain indications of stability with two Liapunov functions
- V. K. GORBUNOV: Minimax impulsive correction of disturbances of a linear damped oscillator
- M. A. PINSKII: Quasinormal and normal oscillations of conservative systems
- O. I. BOGOIAVLENSKII: Dynamics of a gravitating gas ellipsoid
- Iu. B. PONOMARENKO: On principal resonance in mechanics of continuous media
- V. A. MAKSIMOV: On the determination of shapes of bodies formed during cooling of flow of the liquid phase
- V. S. PROTSENKO and V. L. RVACHEV: A plate having the shape of an infinite strip resting on an elastic half-space
- B. M. NULLER: On the deformation of an elastic wedge-shaped plate reinforced by a bar of variable rigidity and on a method of solving mixed problems
- B. A. SHOIKHET: An energetic identity, physically nonlinear elasticity and estimates of errors of plate equations
- S. D. ALGAZIN and V. S. LENSII: An analytic study of unloading waves
- V. A. IBRAGIMOV: The state of stress and strain near the tip of a growing crack in an elasto-plastic medium
- V. A. VYIICHICH: Covariant integrals in mechanics
- V. V. KOZLOV: On a problem of Poincaré
- V. G. DEMIN and V. D. FURASOV: On stabilization of guided systems with respect to a part of variables
- N. V. DERENDIAEV: Laminar axisymmetric submerged jet in a rotating fluid
- E. N. POTETIUNKO and L. D. FILIMONOVA: On the character of decay of the rise of the free surface caused by initial disturbance
- P. I. PERLIN: Application of the regular representation of singular integrals to the solution of the second basic problem of the theory of elasticity
- N. N. BORODACHEV: On the character of singularities of contact stresses under an annular die
- Kh. K. SEIFULAEV: Stability of circular cylindrical shells of variable thickness in the presence of a bending state of stress
