

CONTENTS OF NEXT ISSUE

PMM Vol. 40, № 6, 1976

- L. I. SEDOV: On perspectives of directions and problems in mechanics of continuous media
- L. A. GALIN: Contact problems of the theory of elasticity in the presence of wear
- V. I. MAKSIMOV: An alternative in the differential-difference game of approach-evasion with a functional goal
- A. A. CHIKRII and G. Ts. CHIKRII: On differential-difference game of escape
- S. A. CHIGIR': On the game problem of the dolichobrachistochrone
- B. Sh. MORDUKHOVICH: Maximum principle in the problem of optimal motion with nonsmooth constraints
- L. D. AKULENKO: Approximate solution of nonlinear problems of optimal control by oscillatory processes using the method of canonical resolution of motions
- G. N. MIL'SHTEIN and L. B. RIASHKO: Optimal stabilization of linear stochastic systems
- A. P. MARKEEV and T. N. CHEKHOVSKAIA: On stability of cylindrical precession of a lite satellite on an elliptic orbit
- L. M. MARKHASHOV: Asymptotic stability and smooth equivalence of ordinary equations
- S. P. BAUTIN: Approximate method of analysis of one-dimensional gas flow caused by non-monotonic piston motion
- V. S. BERMAN and Iu. S. RIAZANTSEV: On ignition of a homogeneous reacting medium by a heat source with a finite amount of heat
- L. M. ZUBOV: On the representation of the displacement gradient in an isotropic elastic body through the Piola stress tensor
- L. M. KURSHIN and Ts. N. ONOPRIENKO: Determination of doubly connected cross-sectional shapes of bars for maximum rigidity
- N. N. ROGACHEVA: Application of the method of resolution of the state of stress to the analysis of thermo-elastic shells
- U. K. NIGUL: Asymptotic description of the process of formation of nonlinear distortion of one-dimensional impulses in a layered medium
- V. A. BABESHKO: Vibration of two circular stamps on a layered medium
- A. G. CHENTSOV: On an example of a non-regular differential game
- L. E. SHAIKHET: Stability in first approximation of stochastic systems with after-effect
- S. I. ALAD'EV and L. I. ZAICHIK: On self-similar solution of the Navier-Stokes equations with volume sources and mass flow
- V. I. PEN'KOVSKI: On the problem of soil salination which contains easily dissolving salts.
- N. A. SLEZKIN: Fokker-Plank equation for Brownian motion of rotating spherical particles
- D. P. KOUZOV and V. D. LUK'IANOV: On the vector of energy flow for flexural vibrations of plates
- V. A. BRUSIN: Existence of a global Liapunov functional for some classes of nonlinear distributed systems
- S. S. GOLIKOVA and V. I. MOSSAKOVSKI: Pressure of a plane nearly circular in the plane stamp on an elastic half-space
- Alphabetic index
