

CONTENTS OF THE NEXT ISSUE

PMM Vol. 41, № 4, 1977

- E. G. POLISHCHUK: Calculation of cost for some differential games
- S. A. CHIGIR*: On linear game problem of approach with incomplete information
- V. S. PATSKO: Differential game of evasion on a plane.
- V. G. GOLUBEV: On lower estimates of distances between bodies in the unbounded problem of three bodies.
- V. S. AFRAIMOVICH and L. P. SHIL'NIKOV: The ring principle and the problem of interaction of two autovibrating systems.
- M. I. FEIGIN: On the behavior of dynamic systems in the vicinity of boundaries of regions in which periodic motions exist.
- V. T. GRIN*, A. N. KRAIKO, N. I. TILLIAEVA and V. A. SHIRONOSOV: Analysis of stability of one dimensional flow in a channel for arbitrary changes in parameters of stationary flow between a section of a closing jump and exit from the channel.
- I. L. GALINA: Gas flow in a channel with flexible walls.
- S. P. BAKANOV and V. I. ROLDUGIN: Boundary value problems of kinetic gas theory and irreversible thermodynamics.
- G. M. MARKEEV: On isothermal gas flow between parallel planes for arbitrary accommodation of the tangential impulse.
- A. D. POLIANIN and Iu. A. SERGEEV: On diffusion to the absorbing particle for mixed kinetics.
- Iu. P. GUPALO, V. A. NOVIKOV and Iu. S. RIAZANTSEV: On stabilization of unstable stationary regime of a displacing reactor with integral account of heat generation.
- V. M. ALEKSANDROV and E. V. KOVALENKO: On two effective methods of solution of linear mixed problems of mechanics of continuous media.
- V. A. IBRAGIMOV: On a presentation of the solution of problems of anti-plane deformation of a physically nonlinear elastic medium.
- V. N. CHIGAREV: Solution of the first fundamental problem of the theory of elasticity for an infinite strip with several semi-infinite cuts.
- V. S. PROTSENKO: Bending of a system of layered plates resting on an elastic half space.
- V. A. BABESHKO and A. N. RUMIANTSEV: Vibrations of a stamp with cohesion on an elastic layer.
- A. O. VATUL'IAN: Contact problem with adhesion for an anisotropic layer.
- V. M. LEVIN: On stress concentrations at inclusions in composite materials.
- G. N. MIL'SHTEIN: Stability and stabilization of periodic motions of autonomous systems.
- K. I. ARTAMONOV: On interaction of acoustic and vortex disturbances in bounded plane parallel flow of a viscous gas.
- V. B. GORSKII: One dimensional motion of a magnetized conducting gas.
- O. V. GOLUBEVA and V. F. PIVEN*: On motions of the separation boundary of liquids in nonlinear filtration.
- A. S. LOZOVSKII: Plane problem of the theory of viscoelasticity with moving boundaries of phase transitions.
- A. Z. AVERBUKH: Compression of a plane with a crack and an inclusion.
