

CONTENTS OF NEXT ISSUE
PMM Vol. 42, № 4, 1978

- L. T. BUSLAEVA: Stochastic control in a differential game
- M. I. LOGINOV: On a linear game problem of approach
- A. I. KOROTKII and Iu. S. OSIPOV: An approximation in problems of positional control by parabolic systems
- S. P. OKHEZIN: On control by a hyperbolic system under conditions of uncertainty
- L. D. AKULENKO: Optimal stabilization with respect to high speed of a disturbed system with invariant norm
- Iu. P. KRIVENKOV: Sufficient conditions of optimality for linear problems of the mathematical theory of optimal processes with limited phase
- Iu. V. MARTYNOV: On a generalization of the problem of Maxwell's toroidal vortex
- A. A. ZOLOTAREV: Evolution of ship waves
- L. B. AIZIN and V. P. MAKSIMOV: On stability of flow of a weakly compressible gas in a pipe with model roughness
- M. Sh. SHA VALIEV: The Burnett approximation to the distribution function and the super-Burnett contributions to the stress tensor and heat flow
- G. L. SEDOVA: Disintegration of an arbitrary discontinuity of an electromagnetic field in ferro-magnetics
- V. V. KIRIUSHIN, V. A. NALETOVA and V. V. CHEKANOV: Motion of a magnetized fluid in a rotating homogeneous magnetic field
- A. O. TSEBER: Some peculiarities of transfer phenomena in suspensions with internal rotations
- S. A. REGIRER: On the problem of continuum models of suspensions
- F. A. SLOBODKINA and L. I. SELEZNEV: On the stability of the density jump in flows of a spontaneously condensing stream
- I. M. DOLGOVA and Iu. A. MEL'NIKOV: Construction of Green's functions and matrices for equations and systems of elliptical type
- G. L. BROVKO: Necessary and sufficient conditions of uniformly simple deformation
- A. A. BURENIN and A. D. CHERNYSHOV: Shock waves in isotropic elastic space
- S. K. ASLANOV and A. S. SEMENOV: Effect of a buried impulsive loading on a visco-elastic layer covering an elastic halfspace
- V. G. LITVINOV and N. G. MEDVEDEV: Matching methods in problems of stress distribution in shells of revolution
- A. S. KOSMODAMIANSKII and V. N. LOZHKIN: Electro-elastic equilibrium of a thin anisotropic layer taking into account piezoelectric effects
- P. P. MOSOLOV: On some mathematical questions of the theory of incompressible viscoplastic media
- G. I. IAKOVLEV: On reactions in systems with one-sided supports
- A. S. OZIRANER: On optimum stabilization of equilibrium configurations of a rigid body with a cavity filled with fluid
- V. N. PAIMUSHIN: Relation of the theory of thin shells of Timoshenko-type in curvilinear coordinates with respect to the reference surface
- M. P. WNUK: A precritical growth of cracks
