

CONTENTS OF NEXT ISSUE
PMM Vol. 43, Issue 4, 1979

- V. V. RUMIANTSEV; On principles of Lagrange and Jacobi for non-holonomic systems
V. V. BELETSKII and E. K. LAVROVSKII; On the problem of standing of a walking device
- A. D. MOROZOV and E. L. FEDOROV; On autovibrations in two-dimensional dynamic systems close to Hamiltonian ones
- L. B. RIASHKO; Stabilization of linear stochastic systems with disturbances depending on the state and on control
- I. P. SMIRNOV; On optimal control of a dynamic system with random parameters with incomplete information
- L. M. BERKOVICH; Method of exact linearization of nonlinear autonomous differential equations of second order
- S. F. DOTSENKO; and L. V. CHERKESOV; On diffraction of a gravitational surface wave by a small imperfection of the bottom
- A. D. POLIANIN; On mass exchange of a moving chain of absorbing drops taking the effect of saturation into account
- E. B. KREMER and R. F. NAGAEV; On the interaction of a particle with a spherical bubble in the case of small Stokes numbers
- V. L. BERDICHEVSKII; Variational-asymptotic method of constructing theories of shells.
V. Ia. TERESHCHENKO; Method of orthogonal expansion on the boundary of the region in three-dimensional problems of the linear theory of elasticity
- G. Ia. POPOV; Biorthogonal expansion in problems of mechanics
- N. Kh. ARUTIUNIAN and V. B. KOLMANOVSKII; On stability of nonhomogeneously aging viscoelastic bars.
- A. A. BURENIN and V. V. LOPYGIN; Self-similar problem of impact loading of an elastic halfspace
- I. D. SUZDAL'NITSKII; The periodic problem of reinforcement of a plate by stringers weakened by a system of cuts
- O. K. AKSENTIAN and T. N. SELEZNEVA; Steady-state vibrations of an elliptic plate.
N. P. BESTUZHEVA and A. V. CHIGAREV; Propagation of surface waves in a stochastically nonhomogeneous elastic medium (Markov approximation)
- L. G. LOBAS; On the dynamics of a vehicle on pneumatic wheels
- I. V. SIMONOV; Small stationary perturbations behind the front of an oblique shock wave
- V. P. PLEVAKO; Stress distribution in the zone of jumplike changes in elastic properties of a nonhomogeneous material
- V. G. BORISKOVSII; Analysis of stress intensity factors in a vibrating plate with a crack by the finite element method
