

CONTENTS OF NEXT ISSUE

PMM Vol. 43, Issue 6, 1979

- S. V. MEDVEDEV and V. N. TKHAL: On stability in a critical case
- V. E. ZHAVNERCHIK: On instability in the presence of several resonances
- A. S. OZIRANER: On a theorem of Malkin — Massera
- V. G. VERETENNIKOV and V. N. SEREGIN: On the study of vibrations of quasilinear systems with almost periodic coefficients
- V. V. SHELUKHIN: Existence of periodic solutions of a generalized Burger's system.
- L. P. VOZOVOI and A. A. NEPOMNIASHCHII: On stability of spatially periodic convective flows in a vertical layer with wavy boundaries
- G. I. BURDE and I. B. SIMANOVSKII: Determination of the boundaries of convective stability of equilibrium of a two-layered system
- E. D. TERENT'EV: Calculation of pressure in the linear problem of a vibrator in a supersonic boundary layer
- A. B. VATAZHIN and V. I. GRABOVSKII: Electrohydrodynamic flow in a braking electric field, taking account of the inertia of charged particles
- E. V. VENITSIANOV: Asymptotic properties of a one-component model in the dynamic theory of sorption
- V. N. EMIKH: On some hydrodynamic models of draining
- O. D. TANANAIKO: The method of layering in the theory of thin shells
- V. N. MAKSIMOVICH: State of stress of non-uniformly heated edge-loaded plates
- M. I. CHEBAKOV: Method of homogeneous solutions in the mixed problem for a circular cylinder of finite dimensions
- Z. V. AMELINA and V. A. ROMANOV: Contact problem for two micro-nonhomogeneous half-spaces
- L. A. SHENIA VSKII: Influence of geometric nonlinearity on waves propagating in a free thin plate
- V. A. BUZHINSKII: On vibrations of a thin-walled structure with a fluid in the presence of hydrodynamic damping
- V. S. BUDAEV: Conditions of the Sommerfeld type and uniqueness of the solution of the exterior problems of the theory of elastic vibrations of anisotropic media
- Iu. K. GOLIKOV and A. A. MATYSHEV: On some cases of determination of the trajectories for plane conservative motion of a material point
- V. A. SINITSYN: On Carnot's theorem in the theory of impulsive motions of mechanical systems
- V. A. IVANOV and I. A. CHERNOV: On the problem of generation of a shock wave within a local supersonic region
- Iu. P. GUPALO, A. D. POLIANIN, P. A. PRIADKIN, and Iu. S. RIAZANTSEV: On integration of the nonstationary equation of heat exchange of bodies moving in a liquid
- M. I. LAZAREV and P. I. PERLIN: Solution of three-dimensional problems of the theory of elasticity for a piece-wise homogeneous medium with constant Poisson's ratio
- A. V. SKACHENKO, A. N. SPORYKHIN and A. I. SUMIN: On the stability of elastic bodies with random nonhomogeneities for finite strain.
