

CONTENTS OF NEXT ISSUE

Volume 44, Issue 2, 1980

- SEDOV, L. I.: On the description of dynamic properties of the gravitational field in vacuum
- KRIVOSHEEV, Iu. A. and LUTSENKO, A.V.: On stability of motion with respect to a part of variables for linear systems with constant and almost constant matrix
- VU. TUAN: On stability in first approximation with respect to a part of the variables
- LIUBUSHIN, E. A.: On instability of equilibrium when the force function is not a maximum
- KHAZIN, L. G. and SHNOL', E. E.: Conditions of stability of equilibrium in the case of resonance 1:3
- KOZLOV, V. V.: Periodic oscillations of a compound pendulum
- CHUDNENKO, A. N.: On the stability of uniform rotations of a rigid body about a principal axis
- POLISHCHUK, E. G.: Upper estimates for the value of a linear differential game
- PEKUROVSKII, L. E.: Diffraction of a shock wave by a thin wedge moving with sliding with respect to its front in the case of nonregular impact interaction
- KRAIKO, A. N. and SHELOMOVSKII, V. V.: On free expansion of two-dimensional jets of an ideal gas
- BENILOV, M. S. and TIRSKII, G. A.: An asymptotic theory of chemically non-equilibrated layer in the vicinity of an ideally catalytic wall
- GOGOSOV, V. V., NALETOVA, V. A. and SHAPOSHNIKOVA, G. A.: A diffusion and a multi-velocity model of two-phase media in an electric field
- LEVITSKII, L. A.: Diffraction of a plane hydroacoustic wave at the open end of a plane semi-infinite channel with thin elastic walls
- GRIGOR'EV, O. A. and SHERMERGOR, T. D.: Propagation of ultrasonic waves in polycrystals of cubic symmetry taking into account multiple scattering
- KALINCHUK, V. V. and POLIAKOVA, I. B.: On generation of waves in a layer with initial stresses
- SRUBSHCHIK, L. S.: Precritical equilibrium of a thin shallow shell of revolution and its stability
- GRILITSKII, D. V., DRAGAN, M. S. and OPANASOVICH, V. K.: The temperature field and the thermo-elastic state of a plate with a thin-walled elastic inclusion
- BELJAEV, S. Iu. and KUZ'MIN. Iu. N.: The external Neumann problem for a semi-infinite cylinder
- BERKOVICH, L. M.: Transformation of the Gilden-Meshchersii problem to the stationary form and the laws of mass changes
- ZIGLIN, S. L.: On periodic solutions of the bounded circular problem of three bodies, close to doubly-asymptotic ones
- PORUCHIKOV, V. B.: On the solution to problems of diffraction for absolutely rigid and absolutely soft wedge-shaped screens
- GORIACHEVA, I. G.: Contact problem in the presence of wear for an annulus inserted into a cylinder
- OSOKIN, A. E. and SUVOROVA, Iu. V.: Construction of Green's function for a hereditary-elastic anisotropic medium
- MARKOV, V. V.: Misdirected tendencies in the usage of concepts of self-similar phenomena
- BARENBLATT, G. I.: Self-similarity: dimensional analysis and intermediate asymptotics
