

CONTENTS OF NEXT ISSUE

Volume 44, Issue 3, 1980

- ZHURAVLEV, S. G.: Stationary and periodic motions in the field of attraction of a rotating triaxial ellipsoid
- VIL'KE, V. G.: Motion of a viscoelastic sphere in a central Newtonian field of force
- TSOPA, M. P.: On periodic motions of a gyrostat in a Newtonian field
- VOZLINSKII, V. I.: On stability for continuously acting disturbances
- KARAPETIAN, A. V.: On the problem of stability of stationary motions of nonholonomic systems
- APYKHTIN, N. G. and IAKOVLEV, V. F.: On the motion of dynamically controlled systems with variable masses
- KEIN, V. M. PARIKOV, A. N. and SMUROV, M. Iu.: On a procedure of optimal control by the method of extremum targeting
- KOLESOV, V. V.: On conditions of stability of nonisothermal Couette flow
- GARAEV, K. G.: On a consequence of Noether's theorem for the two-dimensional variational Meier problem
- BREZHNEV, A. L. and CHERNOV, I. A.: On the asymptotic theory of sonic flow past bodies of revolution
- SEDOVA, G. L.: Propagation of electromagnetic waves for arbitrary dependence of magnetic permeability on magnetic induction
- GUPALO, Iu. P., NOVIKOV, V. A., and RIAZANTSEV, Iu. S.: On the influence of longitudinal dispersion on the dynamic characteristic of a running chemical reactor
- BABESHKO, V. A. and PRIAKHINA, O. D.: Method of fictitious damping in plane dynamic problems
- BURYSHKIN, M. L.: On the bending of a strip with a transverse row of circular cavities or absolutely rigid inclusions
- ZUBOV, L. M.: On conditions of uniqueness in the small of the states of hydroelastic compression of an elastic body
- PROTSENKO, A. M.: Asymptotics of wave problems for cylindrical shells
- ROGACHEVA, N. N.: Free thermoelastic shells
- KULIKOVSKII, A. G., and SVESHNIKOVA, E. I.: On shock waves propagating along the stress state in isotropic nonlinear elastic media
- ALEKSANDROV, V. M. and FILIPPOVA, L. M.: Contact problem for a heavy half-plane
- BEREZHZNOI, I. A. and IVLEV, D. D.: On integral inequalities of the theory of an elasto-plastic body
- CHIGAREV, A. V.: On the determination of the connection between the average tensors of stress and deformation in structurally nonhomogeneous elastic media
- BYKOVTSSEV, A. S. and CHEREPANOV, G. P.: On modelling an earthquake source
- GEL'MAN, B. D. and GLIKLIKH, Iu. E.: Two-point boundary-value problem in geometrical mechanics with discontinuous forces
- BARKIN, Iu. V. and MARKOV, Iu. G.: Resonant motions of a satellite with respect to the center of mass located at the triangular libration point of the system Earth-Moon
- BONDARENKO, A. G., KOLOBASHKIN, V. M. and KUDRIASHOV, N. A.: Self-similar solution of the problem of gas flow through a porous medium in the regime of turbulent filtration
- UMANSKII, S. E.: On convergence of the method of variable parameters of elasticity
- VOROB'EV, S. N.: Method of solution of a Fredholm integral equation of the first kind
- MARKOV, V. V.: On the response of G. I. Barenblatt to the paper "Illegitimate tendencies in the use of the concept of self-similar phenomena"
