

CONTENTS OF NEXT ISSUE

Volume 44, Issue 5, 1980

- GUSIATNIKOV P.B. and POLOVINKIN E.S.: A simple quasi-linear problem of pursuit
- MELIKIAN A.A.: Game problem of synthesis of a multi-impulsive correction of motion
- BEREZINA E.N. and LEVIT M.V.: Equations for moments and stability conditions of linear systems with scalar parametric disturbance of the Markov chain
- KHODZHAEV K.Sh. and SHATALOV S.D.: On qualitative investigation of motions with the aid of asymptotic methods of nonlinear mechanics
- IVANOV A.P. and SOKOL'SKII A.G.: On stability of non-autonomous Hamiltonian system in the presence of resonance of the second order
- GERSHUNI G.Z., ZHUKHOVITSKII E.M. and SOROKIN L.E.: On stability of plane parallel convective flow of a binary mixture
- VIK V. SYCHEV: On some singularities in the solutions of the boundary layer equations on a moving surface
- BENILOV M.S. and TIRSKII G.A.: Asymptotic theory of a layer of non-equilibrium ionization in the vicinity of a catalytic wall in a plasma of molecular gases
- ENTOV V.M., PANKOV V.N. and PAN'KO S.V.: On the analysis of strata with remaining viscoplastic oil
- BABESHKO V.A. and TKACHEV G.V.: Vibration of a circular crack under three-component loading
- LAZAREV M.I.: Solution of basic problems of the theory of elasticity for incompressible media
- EVTUSHENKO A.A.: Elastic equilibrium of a composite plane with an arbitrarily placed thin elastic inclusion
- RUDEV A.N.: Asymptotic theory of buckling of elastic plates under side compression
- SRUBSHCHIK L.S.: Influence of initial imperfections on the buckling of elastic shells under multiple critical loads
- KURSHIN L.M. and RASTORGUEV G.I.: On the problem of reinforcement of the edge of a cutout in a plate by means of a momentless elastic bar
- KUDRIAVTSEV B.A., PARTON V.Z. and RUBINSKII B.D.: Magneto-thermo-elastic field in a body with a semi-infinite cut
- CHEBAKOV M.I.: Some dynamic and static contact problems of the theory of elasticity for a circular cylinder of finite dimensions
- UKHOBOTOV V.I.: On the construction of stable bridgings
- BEREZOVSKAIA F.S. and Khibnik A.I.: On bifurcation of separatrices and the problem of loss of stability of auto-oscillations in the vicinity of a 1:4 resonance
- ZAKHAROV N.S. and KOROBEINIKOV V.P.: Group analysis of a generalized Korteweg-deVries-Burgers equation
- KAZHIKHOV A.V.: Remarks on the formulation of the flow problem for the equations of an ideal fluid
- IVANOV V.A. and CHERNOV I.A.: Example of transonic flow past a body with a discontinuity of curvature on the contour
- KULIEV V.A.: Singular problem of the theory of elasticity for a semi-infinite rectangular cutout
- BULANOV G.S. and SHALDYRVAN V.A.: On the improvement of convergence of the method of homogeneous solutions
