

CONTENTS OF NEXT ISSUE

Volume 45, Issue 3, 1981

- ABGARIAN K.A.: Basic theorems on stability of a process on a given time interval.
- OZIRANER A.S.: On stability of motions relative to a part of variables for continuously acting perturbations.
- TEREKI I. and KHATVANI L.: On partial stability and convergence of motions.
- TKHAI V.N.: On the problem of stability in the critical case.
- SOKOL'SKII A.G.: On stability of autonomous Hamiltonian system with two degrees of freedom in the case of zero frequencies.
- ZHUPIEV A.L. and MIKHLIN Iu.V.: Stability and branching of normal modes of vibration of non-linear systems.
- KAPODANNO P.: Generalization of the Levi-Civita theorem for nonholonomic systems.
- SUMBATOV A.S.: On linear integrals of Chaplygin's equations.
- FAM GUEN: On the theory of cyclic displacements for generalized Poincaré-Chetaev equations.
- BRENDELEV V.N.: On realization of constraints in nonholonomic mechanics.
- SINITSYN V.A.: On the Hamilton-Ostrogradski principle for impulsive motions of dynamic systems.
- RUBANOVSKII V.N.: On relative equilibrium of a satellite-gyrost at in a generalized bounded circular problem of three bodies.
- KARAPETIAN A.V.: On stability of stationary motions of a heavy rigid body on an absolutely smooth horizontal plane.
- SAMSONOV V.A.: On stabilization of steady motions of systems with pseudo-cyclic coordinates.
- APYKHTIN N.G.: On stabilization of permanent rotations of a rigid body.
- LILLOV L.K. and CHIRIKOV V.A.: On equations of dynamics of systems of coupled bodies.
- BARKIN Iu.V.: Periodic and quasi-periodic solutions in the problem of motion of a heavy rigid body about a fixed point.
- LEBEDEV D.V.: On the control of triaxial orientation of a rigid body in the presence of constraints on the control parameters.
- ZHUK V.I. and RYZHOV O.S.: On stability of a freely interacting boundary layer.
- ZIGLIN S.L.: Self-intersection of complex separatrices and non-existence of integrals in Hamiltonian systems with one and a half degrees of freedom.
- ILIEV I.L. and RUSINOV Iv.: On two approaches to the study of states of equilibrium of non-holonomic mechanical systems.
- KOZLOV V.V.: Instability of equilibrium in a potential field taking into account forces of viscous friction.
- OSEPASHVILI V.Z. and SULIKASHVILI R.S.: On stability and bifurcation of stationary motions of a heavy gyrost at.
