

CONTENTS OF NEXT ISSUE

Volume 46, Issue 2, 1982

- ISHLINSKII A.Iu.: Problems of mechanics in the light of resolutions of the 26th Congress of the Communist Party of the Soviet Union.
- SUBBOTIN A.I. and SUBBOTIN N.N.: Properties of the potential of a differential game.
- PSHENICHNYI B.N. and POKOTILO V.G.: On the problem of observation of a linear object.
- DIMENTBERG M.F.: The method of moments in problems of dynamics of systems with randomly changing parameters.
- TESHUKOV V.M.: On regular reflection of a shock wave from a rigid wall.
- LIKHACHEV V.N.: Breaking of a spherical wave of compression in a liquid.
- SIDORENKO A.D.: Wave adiabatics for media with arbitrary equation of state.
- VOLKOV V.S.: Slow motions of a sphere in an anisotropic visco-elastic liquid.
- GUPALO Iu.P., NOVIKOV V.A. and RIAZANTSEV Iu.S.: Influence of transfer processes on the dynamic characteristics of a flow-through chemical reactor.
- BABICH S.Iu. and GUZ' A.N.: Plane dynamic problems for elastic incompressible bodies with initial stress.
- KOCHUROV V.P.: Sources of stress in two half spaces.
- VIGDERGAUZ S.B.: Conditions of optimality in axisymmetric problems of the theory of elasticity.
- KRAVCHUK A.S.: Solution of contact problems with known Green's function.
- VOLOKITIN G.I.: Stability of a nonlinearly elastic cylinder under side pressure and axial compression.
- BELOKON' A.V.: Vibrations of an elastic nonhomogeneous strip caused by moving loads.
- GOLOVANOV V.A., POPOV A.L. and CHERNYSHEV G.N.: Vibrations of plates under the action of concentrated loads in an acoustic medium.
- MARCHUK R.A. and SHVETS R.N.: Small vibrations of an orthotropic cylindrical shell with a liquid, covered by rigid plates.
- BERDICHEVSKII V.L.: Dispersion of nonlinear waves in a bar.
- BELIAEV A.Iu.: Dispersion of nonlinear three-dimensional waves in a bar.
- LITVINOV V.G. and RUBEZHANSKII Iu.I.: Problems of control using right-hand sides of an elliptic system and their application to the control of the stress-strain state of shells.
- MANEVICH A.I.: On the theory of coupled loss of stability of reinforced thin-walled structures.
- ANISOVICH V.V. and KRIUKOV B.I.: Optimum control using periodic motions of linear systems subjected to impulses.
- ARTYSHEV S.G., BOKOVAIA E.K. and BOKOVOI V.A.: Spherically-symmetric shock waves in a dilating medium.
