

CONTENTS OF NEXT ISSUE

Volume 47, Issue 1, 1983

- ERMOLOV A.N.: On a dynamic problem of decentralized control.
- KHRISANOV S.M.: On Liapunov indices of a linear system with Markov coefficients.
- GOL'TSER Ia.M.: Continuous normal form of a class of nonautonomous parametrically excited systems and its application.
- MARKEEV A.P. and MOSHCHUK N.K.: Qualitative analysis of motion of a heavy solid body on a smooth horizontal plane.
- FUFAEV N.A.: Rolling of a sphere on a horizontal rotating plane.
- PETROV A.G.: Hamilton's principle and some problems of dynamics of an ideal fluid.
- ZINCHENKO A.Z.: Hydrodynamic interaction of two like liquid spheres in a linear flow field.
- BOGDANOVA E.V. and RYZHOV O.S.: On free vibrations of a viscous incompressible fluid in a semi-infinite channel.
- GUPALO Iu.P. and OSTRIK V.M.: On stationary working regimes of chemical reactors with longitudinal and transverse mixing.
- IARIN A.L.: On generation of auto-oscillations during fibres formation.
- GOMAN O.G.: On the Kolosov-Muskhelishvili analogue for a three-dimensional state of stress.
- GLUSHKOV E.V.: Distribution of energy of a surface source in a nonhomogeneous half-space.
- TROSHIN V.G.: On a method of solution of geometrically nonlinear problems of the technical theory of shells.
- GRITSENKO S.I. and ZELENTSOV V.B.: Mixed problems for a strip, partially connected with a rigid foundation.
- BABESHKO V.A., SELEZNEV M.G. SELEZNEVA T.N. and SOKOLOV V.P.: On a method of investigating steady oscillations of an elastic half-space containing a cavity.
- ARUTIUNIAN N.Kh. and NAZAROV S.A.: On singularities of stress function at corner points of a transverse cross-section of a twisted bar with a thin reinforcing cover.
- POBEDRIA B.E.: On the theory of viscoelasticity of structurally nonhomogeneous media.
- KHLUDNEV A.M.: Contact problem of two elastic plates.
- BOGAN Iu.A.: Some plane contact problems of the theory of elasticity for strongly anisotropic media.
- SVEKLO V.A.: Axisymmetric contact problem in the presence of a wedge.
- LEONOV M.Ia. and NISNEVICH E.B.: The inverse problem of the plane theory of plasticity.
- SERGEEV V.S.: Periodic motions of a heavy rigid body with a fixed point close to the dynamically symmetric one.
- STARZHINSKII V.M.: One of the exceptional cases of motion of the Kavalevskaya gyroscope.
- BERSHADSKII A.G.: On the influence of forced small oscillations on the stability of stationary fluid flow.
- ALESHIN N.P., KAMENSKII V.S. and MOGIL'NER L.Iu.: On the solution of a transcendental equation encountered in diffraction problems.
- ANDRIANOV I.V.: On Berger's plate theory.
-
