

CONTENTS OF NEXT ISSUE

Volume 47, Issue 5, 1983

- SAZONOV V.V.: Periodic solutions of systems of ordinary differential equations with a large parameter.
- BULATOVICH R.M.: Hamilton—Jacobi equation in regions of possible motions with a boundary.
- SAITBATTALOV A.A.: On Stability of Poincaré's periodic solutions of Hamiltonian systems in the degenerate case.
- SINITSYN V.A.: On impulsive motion of a rigid body impacting a rough surface.
- ESKIN L.D.: On relaxation of dissipative mechanical systems.
- SIDOROV A.F.: On two types of twisted gas flows.
- GURIN V.B. and TEREENT'EV E.D.: On propagation of non-stationary perturbations in a boundary layer with selfinduced pressure.
- GOLOVIN A.M. and ZHIVOTIAGIN A.F.: Non-stationary convective mass transfer inside a droplet in the presence of volumetric chemical reaction.
- BELOTSERKOVSKII S.M., LIFANOV I.K. and SOLDATOV M.M.: Method of discrete singularities in plane problems of the theory of elasticity.
- ALEKSANDROV V.M. and CHEBAKOV M.I.: On the method of homogeneous solutions in mixed problems of the theory of elasticity for a truncated wedge and a circular sector.
- PEL'TS S.P., Vibration of a cylinder on an elastic layer partially adhering to a stiff foundation.
- BRATUS' A.S.: Design of circular cylindrical shells of minimum weight with fixed frequencies of free vibrations.
- TOVSTIK P.E.: Some problems of stability of cylindrical and conical shells.
- PEKUROVSKII L.E., PORUCHIKOV V.B. and SOZONENKO Iu.A.: Interaction of acoustic waves with bodies covered by a thin compressible layer.
- CHEREPANOV G.P.: Fracture mechanics of multilayered shells. Theory of delamination cracks.
- LOBANOV E.V.: Non-steady propagation of a penny-shaped crack in a transversely isotropic medium.
- VOSTROV V.K.: Fracture of brittle bodies with plane internal and edge cracks.
- LEONOV G.A.: On global stability of the Lorentz system.
- VESNITSKII A.I., KAPLAN L.E. and UTKIN G.A.: Laws of change of energy and momentum in one-dimensional systems with moving reinforcements and loadings.
- SUMBATOV A.S.: On the law of change of the kinetic moment of a sphere rolling on a fixed surface.
- SHELUKHIN V.V.: Evolution of contact discontinuity in a barotropic flow of a viscous gas.
- ANTONETS A.V. and DUBINSKII A.V.: A method of calculating aerodynamic characteristics of bodies on the basis of invariant relations of the theory of local interaction.
- ZHITNIKOV Iu.V. and TULINOV B.M.: Equilibrium of a cut along the arc of the contour for non-homogeneous interaction of the edges.
