

CONTENTS OF NEXT ISSUE

Volume 48, Issue 2, 1984

- ERZHANOV Zh.S. and KALYBAEV A.A.: Comparability of motion of gravitating systems by its reversibility in time.
- NEISHTADT A.I.: On separation of motions in systems with a rapidly rotating phase.
- MELIKIAN A.A. and OVSEEVICH A.I.: Hamiltonian systems with a given invariant manifold and some applications.
- SAUTBATALOV A.A.: On stability of Poincaré periodic solution of Hamiltonian systems.
- AZAROVA O.A., KUZNETSOVA I.V. and KHAPAEV M.M.: Stability investigations in some problems of non-linear mechanics.
- ANDREEV A.S.: On asymptotic stability and instability of the null solution of a non-autonomous system.
- VIL'KE V.G., Motion about a fixed point of a heavy symmetric body with flexible bars.
- BERBIUK V.E.: On controlled rotation of a system of two rigid bodies with elastic elements.
- SYCHEV V.V.: On asymptotic theory of laminar separation on a moving surface.
- PEIGIN S.V.: Hypersonic three-dimensional viscous shock layer in two-phase flow.
- TERENT'EV E.D.: Linear problem of a vibrator, executing harmonic oscillations with post-critical frequencies in a subsonic boundary layer.
- GOLOVIN A.M. and CHIZHOV V.E.: On the analysis of the effective heat conductivity of suspensions.
- ZINCHENKO A.Z.: Influence of hydrodynamic interaction of particles on rheological properties of dilute emulsions.
- DENISOV G.A.: On mathematical description of spiral waves in distributed chemical systems.
- ROGACHEVA N.N.: On Saint Venant in the theory of piezo-elastic shells.
- ONISHCHUK O.V., POPOV G.Ia. and PROTSEROV Iu.S., On some contact problems for reinforced plates.
- FOMIN V.M.: Non-stationary dynamic periodic contact problem for a homogeneous elastic half-plane.
- BORIS A.Iu.: Thermophoresis and interaction of iniformly heated spherical particles in a gas.
- ABRAMOV A.A.: On spatially uniform relaxation in the region of large velocities of molecules.
- KAZENIN D.A. and FASTYKOVSKII G.A.: On a selfsimilar solution of the problem of non-linear diffusional kinetics of a topochemical reaction with variable activity of the surface.
- KRUTIN V.N., MARKOV M.G. and IUMATOV A.Iu. Dispersion of a longitudinal wave due to a spherical cavity with a liquid in an elastic porous saturated medium.
