

CONTENTS OF NEXT ISSUE

Volume 48, Issue 5, 1984

- ANDREEV A.S.: On asymptotic stability and instability of the null solution of a non-autonomous system with respect to a part of the variables.
- VERETENNIKOV V.G. and ZAMTSEV V.V.: Application of the second Liapunov method for estimating regions of stability and attraction.
- IVANOV A.P.: On stability in systems with unrestraining constraints.
- KOVALEVA A.S.: Application of asymptotic methods to some stochastic problems of dynamics of vibro-impacting systems.
- RUBANOVSKII V.N.: On precessional screw motions of a rigid body in a fluid.
- BUROV A.A. and SUBKHANKULOV G.I.: On the existence of supplementing integrals of the equations of motion of a magnetized solid body in an ideal fluid in the presence of a magnetic field.
- BEZHANOV K.A. and TER-KRIKOROV A.M.: Multilayered steady flows of an ideal incompressible fluid over an uneven bottom.
- MINDLIN I.M.: On waves in a homogeneous incompressible fluid induced by a vortex.
- GERSHBEIN E.A. and IUMITSKII S.A.: On the theory of a three-dimensional hypersonic viscous shock layer in the vicinity of the symmetry plane.
- MANUILOVICH S.V.: On free perturbations of a laminar hypersonic flow past a profile.
- BOBKOV N.N. and GUFALO I.U.P.: On the influence of processes of separation and coalescence of bubbles on the mass exchange in a pseudo fluidized layer.
- KULIKOVSKII A.G. and SVESHNIKOVA E.I.: On some properties of a shock adiabat of quasitransverse elastic waves.
- KUDISH I.I.: The hydrodynamic contact problem of the theory of lubrication for elastic bodies with cracks.
- ROMENSKAIA G.I. and SUMBATIAN M.A.: Asymptotic approach to problems of the theory of elasticity for bodies of finite dimensions.
- SILOVANIUK V.P. and STADNIK M.M.: Axisymmetric problem for a layer with a system of thin elastic inclusions.
- CHIGAREV A.V.: On the method of the standard equation in the dynamics of structurally non-homogeneous elastic media.
- PETUKHOV L.V. AND REPIN S.I.: Application of duality methods in problems of shape optimization of elastic bodies.
- BORODACHEV P.N.: On a method of solving a two-dimensional integral equation of the first kind with a power kernel and its application to contact problems.
- MKHITARIAN S.M.: On a spectral relation in spheroidal wave functions and its application to contact problems.
- GOL'DSTEIN R.V., KAPTSOV A.V. and KOREL'SHTEIN L.B.: Asymptotic solution of three-dimensional problems of the theory of elasticity on stretched plane cleavage cracks.
- NABIULLIN M.K.: Stationary motions of a gyrostat with an elastic ring plate and their stability.
- KOVALENKO E.V.: On an integral equation of contact problems of the theory of elasticity in the presence of abrasive wear.
- RVACHEV V.L. and SHEIKO T.I.: Method of R-functions in problems of analysis of fields for bodies whose physical characteristics possess discontinuities of the first kind.
- NOVIKOV V.G. and TULINOV B.M.: State of stress in a plane with a periodic system of parallel pairs of longitudinal shear cracks.
