

JOURNAL OF APPLIED MATHEMATICS & MECHANICS

Contents of Next Issue

Volume 55, Issue 5, 1991

- TKHAI V.N.: On the behaviour of a reversible mechanical system on the boundary of the stability region.
- KOZLOV V.V. and CHIGUR I.I., On stability of periodic trajectories of a spatial billiard.
- IVANOV A.G., On a quasiperiodic Lyapunov problem.
- KOLMANOVSKII V.B. and KOROLEVA N.I.: On the control of a predator-prey system taking into account internally seen competition.
- MALIUKOV V.P.: Qualitative differential game of two groups of objects.
- MELIKIAN A.A. and OVAKIMIAN N.V.: The game problem of simple pursuit on a two-dimensional cone.
- PLOTNIKOV A.V. and PLOTNIKOVA L.I.: Two problems of encounter under conditions of indeterminacy.
- BARANOV A.S.: Some simple shapes of viscous oscillations of ellipsoidal equilibrium shapes.
- SIDOROV A.F.: Shockless compression of a barotropic gas.
- RYLOV A.I.: On some properties of subsonic flow behind a shock wave generated during supersonic flow past bodies of finite thickness.
- GORSHENIN K.P.: On critical surfaces and other singularities of "smooth" axisymmetric plasma flows in a channel.
- MALOMED B.A., MITLIN V.S. and NIKOLAYEVSKII V.N., Short wave bifurcation in a model of a seismically active medium and dominant frequencies.
- AMETOV I.M., AKHATOV I.SH. and BAIKOV V.A.: Stability of dislodging of non-mixing viscoelastic liquids in a porous medium.
- OSTAPENKO N.A.: Penetration of a thin cyclically symmetric three-dimensional body into an elastic half-space.
- MOVCHAN A.B. and NAZAROV S.A.: Influence of small surface roughness on the state of stress in a body and the energetic balance during crack growth.
- KOSHNAREVA V.A. and MEL'NIKOV A.: On the separation from the foundation of an elastic strip containing absolute rigid inclusions.
- PERLIN P.I.: On asymptotics of solutions of boundary-value problems of potential theory and the theory of elasticity in the vicinity of conical boundary points.
- ALEKSEYEVA L.A.: Fundamental solutions in the elastic half-space in the case of moving loads.
- ROSSIKHIN YU.A. and SHITIKOVA M.V.: The Rayleigh method of studying unsteady wave processes in a thin elastic anisotropic layer.
- TROIANOVSKII I. E., SHARDAKOV I.N. and SHEVELEV N.A.: The problem of eigenvalues and shapes of rotating deformable structures.
- SOKOLOV B.N.: Stabilization of controlled holonomic systems in the vicinity of equilibrium states.
- NAZAROV G.I. and PUCHKOV A.A.: Equilibrium of a parabolic-logarithmic shell of revolution.
- KUZNETSOV S.V.: Interaction of these locations in an anisotropic medium.
- LENSKII V.S.: Rayleigh motions in an elastic half-space with a constraint boundary.
- SADYKHOV V.E.: Approximate formulas for the stress intensity factor at the tip of an edge of longitudinal shear.
