

## **JOURNAL OF APPLIED MATHEMATICS AND MECHANICS**

### **CONTENTS OF NEXT ISSUE**

Volume 55, No. 6, 1991

- F. L. CHERNOUS'KO: Control synthesis by a system with a nonlinear resistance
- N. K. MOSHCHUK and I. N. SINITSYN: On stationary and reducible to stationary regimes in normal stochastic differential systems
- A. L. KUNITSYN and M. V. MATVEYEV: On stability of a class of reversible systems
- O. S. RYZHOV and Ye. D. THERENT'EV: On wave motions in a spatial boundary layer
- M. A. BRUTYAN and P. L. KRAPIVSKII: Study of stability of periodic flows of a viscous liquid
- L. D. AKULENKO and S. V. NESTEROV: Oscillations of a cylinder in a concentric vessel, fitted with a two-layered liquid
- N. I. YAVORSKII: Heat wake of flow past a body
- O. Yu. YINARIYEV: On the structure of a perturbation front for transfer processes with relaxation
- M. D. KOVALENKO: Biorthogonal expansions in the first fundamental problem of the theory of elasticity
- A. L. KALAMKAROV, B. A. KUDRYAVTSEV and V. Z. PARTON: Novel integral transformations in boundary value problems for layered composites with periodic structure
- I. A. PASHKOV and I. Ye. TROYANOVSKII: A method of eigenmode expansion of vibrations of an elastic body with internal and external friction
- A. M. GOMILKO, V. T. GRINCHENKO and O. N. MARTYNENKO: Edge resonance in a semi-infinite elastic, rigidly clamped wave guide
- P. F. KURCHANOV, A. D. MYSHKIS and A. M. FILIMONOV: Vibrations of a railroad composition and Kronecher's theorem
- V. G. SUTYRIN: Models of elastic media with stress relaxation
- Yu. A. ANTIPOV and N. Kh. ARUTYUNYAN: Contact problems of the theory of elasticity in the presence of friction and adhesion
- A. V. MANZHIROV and V. A. CHERNYSH: The contact problem of discrete growth of a non-homogeneous viscoelastic aging cylinder by a system of rigid inclusions
- S. I. REPIN: On variational formulations for discontinuous displacement fields in problems of deformational theory of plasticity without hardening
- Yu. M. KOLYANO, B. V. PROTSYUK and V. M. SINYUTA: The static axi-symmetric problem of thermoelasticity for a multi-layered cylinder
- V. M. SADOVSKII: Hyperbolic variational inequalities in dynamic problems of elasto-plastic bodies
- S. G. ARTYSHEV: Motion of a particle in a nonstationary field of a logarithmic potential
- V. M. GALKIN and Yu. A. STEPANYANTS: On the existence of stationary solitary waves in a rotating liquid

- V. A. POZDEYEV: The method of nonlinear time transformation in boundary value problems of potential theory with moving boundaries for the linear wave equation
- V. S. KRUTIKOV: On a solution of the inverse problem for the wave equation with nonlinear conditions in regions with moving boundaries
- V. I. MOSSAKOVSKII and Ye. V. POSHIVALOVA: The non-axially symmetric contact problem in the case of normal loading applied outside the contact region
