

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 57, No. 4, 1993

- P. S. KRASILNIKOV: On algebraic criteria of asymptotic stability for the 1:1 resonance
- Ye. V. SINITSYN: On a quasistatic approach for the study of stability of solutions of a class of mechanical systems with an infinite number of degrees of freedom
- M. B. SEVRYUK and A. P. SEIRANIAN: Evolution of oscillation frequencies of a dissipative system
- Ye. V. VERKHOVOD and G. V. GORR: Precessional-isoconical motions of a rigid body with a fixed point
- M. V. SHAMOLIN: Classification of phase portraits in the problem of motion of a body in a resisting medium in the presence of a linear damping moment
- A. B. KISTOVICH and Yu. D. CHASHECHKIN: Structure of a boundary flow on an inclined plane in a continuously stratified medium
- N. N. BOBKOV and Yu. P. GUPALO: Dynamics of local inhomogeneities of solid phase concentration in a pseudo-liquifier layer of magnetic particles
- N. I. GAMAYUNOV: Some problems of sorption and desorption in biporous media
- V. V. NESTRENKO: On the theory of transverse vibrations of a Timoshenko beam
- A. P. ZAIKA and N. V. SLONOVSKII: On asymptotic representations of the solution of the Timoshenko integral equation for the theory of transverse impact
- Yu. B. NAZARENKO: Diffraction of spherical waves at a cylindrical cavity, reinforced by a stiff shell
- G. A. SHATALOV: Frequency dispersion of elastic waves in irregular composites
- O. D. PRIAKHINA and M. R. FREIGEIT: On a method of dynamic analysis of a massive stamp on a multilayered foundation
- T. I. BELYANKOV and V. V. KALINCHUK: On the interaction of an oscillating stamp with a prestressed halfspace
- R. M. BULATOVICH: Remarks on asymptotic motions of mechanical systems
- A. G. PETROV and V. G. SMOLYANIN: Analysis of non-stationary waves on the surface of a heavy liquid of finite depth
- P. I. PERLIN: On an application of divergent integrals in problems of potential theory and elasticity theory
- Yu. A. DEM'YANOV: Asymptotic method of solution of wave propagation problems in a string
- A. O. VATUL'YAN and I. A. GUSEVA: On re-establishment of the cavity shape in an orthotropic half-plane for a specified wave field on the boundary
- S. V. NOVOTNYI: Propagation of elastic waves along a cylindrical cavity with restrained boundary
- V. Ya. TERESHENKO: Numerical-analytical algorithm of crack problems
