

**JOURNAL OF APPLIED MATHEMATICS AND MECHANICS**  
**CONTENTS OF NEXT ISSUE**  
Volume 57, No. 6, 1993

- I. I. KOSENKO: Representation of the solution to the problem of two fixed centres with the aid of modular functions
- T. K. SIRAZETDINOV and Sh. Sh. KHUZIATOV: On stability of systems with distributed parameters with a lagging argument
- T. B. KOPEIKINA and O. B. TSEKHAN: Observability of linear, singularly perturbed systems in state space
- R. GABASOV and F. M. KIRILLOVA: On construction methods of optimal stabilizers
- A. M. KOVALEV: Guidance of dynamical systems by a pact of variables
- E. K. LAVROVSKII and A. M. FORMAL'SKII: Guidance by an elastic link of a manipulator with the aid of feedback with respect to location and velocity of the weight
- N. N. PETROV: Quasilinear conflict-controlled processes with supplemental bounds
- S. Yu. YEREMENKO: Method of equilibrated boundary elements in boundary-value problems of the theory of elasticity
- E. V. LOBANOV: Thermodynamics of diffusive damage in solid bodies
- D. BARDZOKAS and N. A. SE'NIK: Excitation by surface electrodes of symmetric and antisymmetric Lamb waves in a piezostrip
- A. L. KRYLOV, N. G. MAZUR, V. N. NIKOLAYEVSKII and G. A. EL': Gradient-coherent non-linear model of ultrasound generation for seismic wave propagation
- I. V. SIMONOV: Cavitation penetration of minimum resistance bodies into a solid medium
- A. N. BORODACHEV: General method of constructing spatial weight functions for elastic bodies with cracks
- P. V. MARTINENKO and A. I. SOLOV'EV: Equilibrium of an elastic half-space weakened by two spherical cavities and an external circular crack
- O. P. ALEKSEYENKO and A. M. VAISMAN: Growth of a circular crack of hydrofracture in elastic space for plastic hardening of the material
- V. V. RUMYANTSEV and S. P. SOSNITSKII: On instability of equilibrium of holonomic conservative systems
- A. L. GONOR: Determination of plane flow parameters of an incompressible fluid for small variation of the profile contour
