

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 60, No. 1, 1996

- L. I. SEDOV: Gravitation theory in the special theory of relativity
V. V. KOZLOV and S. D. FURSA: The first method of Lyapunov for strongly non-linear systems
P. S. KRASIL'NIKOV: On asymptotic stability at 1:3 resonance
A. A. BUROV: On the motion of cross-shaped bodies about a fixed point in a central Newtonian force field
V. Yu. OL'SHANSKII: The linear and quadratic integrals of complex mechanical systems
M. A. BRUTYAN: Unidirectional flows of liquids with non-linear viscosity in tubes
S. V. KHABIROV: Submodel for spiral motions in gas dynamics
A. G. KULIKOVSKII and E. I. SVESHNIKOVA: On the existence and uniqueness of self-similar solutions when there are Jouguet points on the shock adiabat
V. M. BABICH: The diffraction of a high-frequency acoustic wave by a narrow-angle absolutely rigid cone of arbitrary shape
E. L. AERO: Plane boundary-value problems for sine-Helmholtz equations in the theory of elasticity of liquid crystals in inhomogeneous magnetic fields
L. D. AKULENKO and S. V. NESTEROV: Analysis of spatial non-linear oscillations of a string
A. N. DRUZ' and Yu. A. USTINOV: Green's tensor for an elastic cylinder and its application for the development of Saint Venant's theory
V. V. VASIL'YEV and S. A. LUR'YE: The method of homogeneous solutions and biorthogonal expansions in the plane problem of the theory of elasticity for an orthotropic body
S. V. KOLESNIKOV: Improved theory of oscillations of a cylindrical shell based on the expansion into series of the normal displacement
Yu. I. VINOGRADOV and G. B. MEN'KOV: Construction of special functions for the analytical solution of boundary-value problems for conic shells
V. M. ALEKSANDROV: The interaction of an inclined plane circular punch with an elastic half-space
V. M. FOMIN: Steady-state antiplane dynamical contact problem of periodic structure for an elastic half-space
A. V. BELOKON' and A. V. NASEDKIN: Some features of the natural frequencies for finite electro-elastic bodies
I. V. PANFEROV: Uniform heating of locally inhomogeneous plate
A. A. YEVTUSHENKO, I. V. PANASYUK and O. M. UKHANSKAYA: The thermal stressed state of an elastic half-space heated by a heat source moving with constant velocity
I. A. KIIKO: Flutter of a viscoelastic plate
