

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 60, No. 2, 1996

- L. T. ASHCHEPKOV and N. I. BARANTCHIKOVA: Maximum principle for feedback controls and problem of synthesis of optimal systems
- E. R. BELOUSOV and M. A. ZARKH: Time optimal synthesis in the linear control problems of the fourth order
- N. V. BALASHEVICH, R. GABASOV and F. M. KIRILLOVA: Stabilization of dynamical systems under continuous perturbations
- A. Yu. ALEKSANDROV: The stability of equilibrium of unsteady systems
- V. B. KOLMANOVSKII: Stability of neutral type hereditary systems
- V. N. PILIPCHUK: Analysis of mechanical systems under impulsive excitation
- A. A. ZEVIN: The theory of linear gyroscopic systems
- A. P. MARKEYEV: The oscillations of a mass point suspended by an ideal thread
- A. M. FORMAL'SKII: The time-optimal turning of a plane two-link mechanism
- B. V. NERUBAILO and L. G. SMIRNOV: A class of integral equations of the axially symmetric theory of elasticity for composite space with cracks at the interface
- I. A. SOLDATENKOV: The symmetrical punch indentation into an elastic half-plane with adhesion
- S. I. GORBAL' and V. F. YEMETS: Integro-differential equations of elastic waves scattering by a plane thin inclusion of high stiffness
- E. V. GLUSHKOV and N. V. GLUSHKOVA: Elastodynamic diffraction by a three-dimensional crack of arbitrary shape
- L. A. AGALOVYAN, R. S. GEVORKIAN and G. G. KHACHATRYAN: Mixed boundary-value problems for anisotropic plates with variable thickness
- K. Sh. MKRTCHYAN: Propagation of oscillations induced by a point source in an anisotropic plane or in a half-plane covered by a thin film
- A. O. VATUL'YAN: The fundamental solutions of unsteady problems of electroelasticity
- V. M. LEVIN: The effective properties of piezoactive matrix composite materials
- V. F. ZHURAVLEV: A solid angle theorem in the dynamics of the rigid body
- L. G. LOBAS: Non-linear stability and pitchfork bifurcations in dynamical systems with simplest symmetry
- G. A. LEONOV: Localization of attractors of non-autonomous Lienard equation by the method of discontinuous comparison systems
- A. G. KOTOUSOV: Integral estimated for non-linear oscillation systems
- S. V. ZAKHAROVA and V. M. SHIKHMAN: Forced flexural vibrations of an elastic semi-strip under mixed boundary conditions
- I. A. BOLGRABSKAYA: Justification of the study of dynamic properties of an elastic rod on the basis of a model of a system of interconnected solid bodies
