

# JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

## CONTENTS OF NEXT ISSUE

### Volume 61, No. 3, 1997

- A. P. IVANOV: The problem of constrained impact
- A. P. MARKEYEV: A critical case in the fourth-order resonance set of a mechanical system with quadratic integrals
- V. I. OREKHOV: Dual parametrization of the bifurcation set of a mechanical system with quadratic interval
- R. M. BULATOVIC: The stability of linear potential gyroscopic systems in cases when potential energy possesses a maximum
- V. V. KOZLOV: Stabilization of unstable equilibria of charges by strong magnetic fields
- I. V. BOIKOV: The stability of motion in a system with aftereffect
- K. A. ZEMSKOV and A. G. PASHKOV: Construction of optimal positional strategies in a pursuit–evasion differential game with one pursuer and two evaders
- V. N. USHAKOV and A. P. KHRIPUNOV: An approximate construction of solutions in game control problems
- N. V. MEL'NIKOV and A. M. TARAS'YEV: Gradients of local linear shells in finite difference operators for Hamilton–Jacobi equations
- P. A. MAZUROV: The construction of variational principles
- A. I. KOROTKII: Reconstruction of control set by state measurement of the evolutionary system
- I. V. BURKOV and L. B. FREIDOVICH: Stabilization of a Lagrangian system with elastic elements under the restrictions on control with and without velocity measurements
- E. K. LAVROVSKII and A. M. FORMAL'SKII: Stabilization of the equilibrium of a circular membrane
- L. D. AKULENKO and S. V. NESTEROV: An effective method for investigating oscillations of substantially inhomogeneous distributed systems
- E. L. AERO and S. A. VAKULENKO: Non-linear orientational deformation kinetics in liquid crystals under a constant magnetic field
- P. V. KERESHKA: Proper mixed problem on the bending of a thin elastic plate with the shape of a segment
- D. D. ZAKHAROV: Green's tensor and boundary integral equations for thin elastic non-symmetric anisotropic laminates
- G. Ya. POPOV: Elastic stress concentration problem near a conic defect
- V. N. KUKUDZHANOV and D. N. SHNEIDERMAN: Solving an elastoplastic problem of non-axisymmetric deformation of an axisymmetric body
- D. V. BALANDIN: Estimates of maximum displacement of a solid body in a hybrid system with dry friction
- A. Z. FAZYLOV: Sufficient conditions for optimality in the viability problem
- A. I. VESNITSKII and I. V. MILOSERDOVA: An optimum damper of longitudinal oscillations of a bar
- V. A. BUCHIN and I. V. PANFEROV: The plane problem of the theory of elasticity of the rotation of a right prism with square cross-section
