

# JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

## CONTENTS OF NEXT ISSUE

### Volume 62, No. 1, 1998

- V. V. KOZLOV: Branching of solutions and polynomial integrals of the equations of dynamics
- A. V. KARAPETYAN and I. I. NARALENKOVA: On the bifurcation of equilibria of mechanical systems with symmetric potential
- V. I. YUDOVICH: Bifurcation in the creation of a cycle from a family of equilibria of a dynamical system
- A. Yu. ALEKSANDROV: On the asymptotic stability of equilibrium of non-autonomous systems
- A. A. ZEVIN: On the stability domains of linear canonical systems with periodic coefficients
- A. S. KOVALEVA: Near resonant motion in systems with random perturbations
- V. N. TKHAI: On continuing the periodic motions of a reversible system in structurally unstable cases. Application to the N-body problem
- E. V. ABRAROVA: On steady motions of two elastically connected bodies
- V. S. SERGEYEV: On the instability in the critical cases of a pair of pure imaginary roots for a class of systems with after-effect
- T. V. KOZLOVA: Non-integrability of a rotating elliptic billiard ball
- V. V. AMEL'KIN and B. S. KALITIN: An ideal "two-impact" model of a clock with analytical strongly isochronous oscillator of free oscillations
- V. M. MATROSOV and I. A. FINOGENKO: On the attraction for autonomous mechanical systems with sliding friction
- A. M. KOVALEV: Criteria of functional controllability and invertibility of non-linear systems
- S. A. RESHMIN and F. L. CHERNOUS'KO: Control synthesis in a non-linear dynamical system based on decomposition
- L. D. AKULENKO and A. M. SHMATKOV: Synthesis of control in the problem of time-optimal motion of a point mass to a specified position at zero velocity
- N. V. BALASHEVICH, R. GABASOV and F. M. KIRILLOVA: Synthesis of optimal feedback and stabilization of systems with delay in control
- S. S. GRIGORYAN and E. F. HAYRETDINOV: Transient spreading of a viscous fluid film over a curved surface
- MEI FENGXIANG: The algebraic structure of and Poisson's theory for the equations of motion of non-holonomic systems
- V. I. DRAGOVICH: Integrable perturbations of the Birkhoff billiard type within an ellipse
- E. N. BERESLAVSKII: Determination of the underground contour of a deepened apron with a constant speed sector in the presence of salt proped waters
