

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 62, No. 2, 1998

- Kh. G. GUSEINOV, A. N. MOISEYEV and V. N. USHAKOV: On the approximation of reachable sets of controlled systems
- N. Yu. LUKOYANOV: On the problem of calculation of the cost of a differential game for a positional functional
- IBRAGIMOV GAFURZHAN: On the optimal pursuit game of several pursuers and one evader
- I. KOSENKO: The integration of the equations of the rigid body rotational motion in quaternion algebra. The Euler case
- L. AFENDIKOV and V. P. VARIN: Degenerate Hopf bifurcation in multiparameter hydrodynamical problems
- N. KRAIKO: Optimum-design isoperimetric problem of infinite two-dimensional slider bearing
- V. A. BUZHINSKII: Vortex slosh damping in tanks with baffles
- V. A. BOROVNIKOV: The far field of moving oscillating source: resonance case
- Yu. V. KISTOVICH and Yu. D. CHASHECHKIN: Localized and bulk internal waves in a stratified fluid bordering with a mixed layer
- S. V. KHABIROV: Submodel gas rotary motion in a homogeneous force field
- I. A. ALDOSHINA and S. A. NAZAROV: The asymptotic exactness of transmission conditions on the junction of planes with very different characteristics
- I. I. ARGATOV: Integral characteristics of rigid inclusions and cavities in the plane theory of elasticity
- V. G. POPOV: Diffraction of plane elastic waves on the delaminated rigid inclusion in the case of smooth contact in the delaminated area
- Ye. V. GLUSHKOV, N. V. GLUSHKOVA and O. N. LAPINA: Normal mode diffraction in compound and step-like elastic waveguides
- V. E. WILDEMANN: On the solutions of elastic-plastic problems with contact boundary conditions for solids with loss-of-strength zones
- V. V. BOLOTIN and A. A. SHIPKOV: A model of environmentally affected corrosion fatigue crack growth
- M. A. SUMBATYAN and M. CIARLETTA: Free-surface oscillations of a two-layer elastic half-space with a periodic array of cracks
- N. M. BORODACHEV: A method of constructing the weight function for a body with a crack
- I. V. ANDRIANOV, V. A. OLEVSKII and S. TOKARZEWKI: Modified Adomian's decomposition method
- S. D. SVETLICHNAYA and Ye. G. YANYUTIN: Unsteady deformation of elastic bodies with the shape of a circular cylindrical segment
- A. S. KOSMODAMIANSKII and N. M. NESKORODEV: The relation between the equations of the plane theory of elasticity for anisotropic and isotropic bodies
- Obituary
