

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 62, No. 4, 1998

Announcement

- V. V. RUMYANTSEV: On the Poincaré and Chetayev equations
- A. V. KARAPETYAN and I. S. LAGUTINA: The effect of dissipative and constant forces on the form and stability of steady motions of mechanical systems with cyclic coordinates
- G. A. LEONOV: Stability by the first approximation
- R. GABASOV and A. V. LUBOCHKIN: Stabilization of linear dynamical systems by optimal controls of linear quadratic problems
- A. I. KOROTKII: Reconstruction of controls under incomplete information on the dynamics of a system
- N. V. MEL'NIKOVA and A. M. TARAS'YEV: Optimal synthesis in grid schemes for quasi-convex approximate functions
- N. Yu. LUKOYANOV and T. N. RESHETOVA: Problems of conflict control of functional multi-dimensional systems
- G. Ye. IVANOV: Guaranteed control for differential games with ellipsoidal payment
- A. G. PETROV: Two-dimensional problem of extrusion of viscoplastic medium by parallel plates
- J. WITTENBURG: Inversion of tridiagonal Toeplitz and periodic matrices with applications to mechanics
- I. Ye. ANUFRIYEV and L. V. PETUKHOV: The application of a stable boundary-analogue collocation method to approximate the solutions of some problems in mechanics
- V. M. MAL'KOV: On the forms of the relation between the stress and strain tensors in non-linearly elastic material
- S. A. NAZAROV and M. SPECUVIUS-NEUGEBAUER: On the errors due to approximation of unbounded elastic bodies by bounded ones
- A. L. GOL'DENVEIZER: The boundary conditions in the two-dimensional theory of shells. The mechanical aspect of the issue
- I. I. VOROVICH and L. P. LEBEDEV: On well-posedness of the problem of equilibrium in the non-linear theory of elastic shallow shells
- S. A. AMBARTSUMYAN: A theory of very shallow shells based on non-symmetrical theory of elasticity
- D. P. KARGIN, N. V. KURBATOVA and Yu. A. USTINOV: The homogeneous solutions and Saint-Venant's problems for a spiral spring
- M. L. FIL'SHTINSKII: Diffraction of the acousto-electric waves on the tunnel cavities in an unbounded piezoceramic medium
- V. I. KONDAUROV: The features of the failure waves in highly homogeneous materials
- G. G. YERMOLENKO and S. A. YUSHKOV: The solution method of the first initial boundary-value problem for a linear isotropic elastic solid
