

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 63, No. 2, 1999

- P. Ya. Kochina 100th birthday
- P. Ya. KOCHINA and N. N. KOCHINA: Some properties of fractional-linear transformations
- V. V. RUMYANTSEV: On the forms of the Hamilton principle in quasicordinates
- V. N. TKHAI: Rotational motions of mechanical systems
- A. A. DZHUMBAYEVA, A. L. KUNITSYN and A. A. TUYAKBAYEV: On the stabilization of the collinear libration points in the Earth–moon system
- Yu. F. GOLUBEV: The resonance of one-degree-of-freedom linear system with piecewise constant parameters
- A. P. MARKEYEV: On dynamics of a spherical pendulum with a vibration pivot
- N. N. SUBBOTINA: Asymptotics for singularly perturbed Hamilton–Jacobi equations
- S. V. SOKOLOV and I. V. SHCHERBAN: Synthesis of optimal control for dynamic structures
- V. V. KOZLOV: Frozen line fields, small denominators and chaotization of steady-state flows of viscous fluids
- O. Yu. DINARIYEV: The relation between the mechanics of finite dimensional systems with memory and the infinite-dimensional Hamiltonian
- M. Ya. IVANOV and L. V. TERENT'YEVA: Steady solitary wave solutions of Euler equations in the presence of internal force fields
- O. V. MOTYGIN: Trapped modes for surface-piercing cylinders in oblique liquid waves
- V. M. ENTOV: On dynamics of a thin slug of a chemical in a flow through porous media
- V. I. YEROFEYEV and I. N. SOLDATOV: The interface shear wave at the boundary of an elastic body and a micropolar fluid
- V. M. ALEKSANDROV and D. A. POZHARSKII: On an asymptotic method in contact problems
- V. B. ZELENTSOV: On an asymptotic method for transient dynamic contact problems
- V. Y. STOLBOV and P. V. TRUSOV: Optimal control of the strain path in complex metal loading
- I. A. KIIKO: Formulation of the flutter problem for a shell of revolution and a shallow shell in high supersonic gas flow
- V. S. ZHIROV: A light wing
- L. Z. FISHMAN: Stability of systems with lag at the points of the boundary of a stability domain where safe sections go over into unsafe ones
- V. B. LISIN and A. I. POTAPOV: Variational method for deriving equations of non-linear dynamics of liquid crystals
- M. N. STEPANYAN: Concentrated moment at an arbitrary point of an elastic plane, weakened by an elliptic opening
