

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 63, No. 5, 1999

- F. L. CHERNOUS'KO: Control of a system with one degree of freedom with complex constraints
- V. I. MAKSIMOV and L. PANDOLFI: The reconstruction of controls in non-linear distributed systems
- V. I. MATYUKHIN: Stabilization of the motion of mechanical systems with non-holonomic couplings
- V. I. VOROTNIKOV: Problems of stability with respect to part of the variables
- L. D. AKULENKO, S. V. NESTEROV and A. M. SHMATKOV: Generalized parametric oscillations of mechanical systems
- A. P. MARKEYEV: Non-linear oscillations of a Hamilton system for 2:1 resonance
- V. A. SAMSONOV: Reorganization of a configuration manifold and critical systems
- G. B. MALYKIN: Application of the solid angle theorem in the special theory of relativity
- A. P. BLINOV: A special case of the motion of a point mass
- O. V. KHOLOSTOVA: The dynamics of a Lagrange top with a vibrating point of suspension
- A. S. KULESHOV: The steady motion of a disk on an absolutely rough plane
- V. A. YEREMEYEV and L. M. ZUBOV: The theory of elastic and viscoelastic micropolar fluids
- A. A. GUBAIDULLIN and O. Yu. KUCHUGURINA: The propagation of weak perturbations in cracked porous media
- D. V. GEORGIEVSKII: The problem of the stability of quasilinear flows with respect to perturbations of the hardening function
- V. D. POTAPOV: The stability of the solutions of linear stochastic integro-differential equations encountered in elasticity and viscoelasticity problems
- A. A. YEVTUSHENKO and Y. A. PYR'YEV: The applicability of the hereditary model of wear with an exponential kernel in the one-dimensional contact problem, taking frictional heat generation into account
- L. A. ALEKSEYEVA, A. N. DADAYEVA and N. B. ZHANBYRBAYEV: The method of boundary integral equations in non-steady boundary-value problems of uncoupled thermoelasticity
- A. V. KAPTSOV and S. V. KUZNETSOV: Some analytical solutions for Rayleigh waves in cubic crystals
- A. V. ANDREYEV, R. V. GOL'DSHETIN and Yu. V. ZHITNIKOV: Asymptotic analysis of the solution in the neighbourhood of the breaking point of an interface crack
- A. A. IGNAT'YEV: Equiasymptotic stability with respect to part of the variables
- E. I. DRUZHININ: The permanent rotations of a balanced non-autonomous gyrostat
- Obituary: P. Ya. Kochina
