

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 64, No. 1, 2000

- S. V. Kovalevskay on the 150th anniversary of her birth
- F. L. CHERNOUS'KO: Motion of a linkage on a horizontal plane
- L. A. MANITA: The optimal chattering trajectories in the problem of manipulator's control
- V. A. VUJIVIC and A. M. KOVALEV: Controllability and decomposition in mechanical systems
- M. V. DERYABIB: On Dirac Hamiltonian formalism and realization of constraints by small masses
- V. N. TKHAI: Lyapunov families of periodic motions in a reversible system
- S. P. SOSNITSKII: On the stabilization of equilibria of conservative systems by gyroscopic forces
- V. Yu. OL'SHANSKII: Linear and quadratic integrals in a problem of gyrostat motion in a magnetic field
- L. I. KONKINA: The motion of a body with elastic elements about a fixed point in action-angle variables
- A. V. KARAPETYAN and O. V. PROKONINA: On the stability of permanent rotations of a top with a cavity filled with liquid on a plane with friction
- D. M. AZIMOV: Optimal intermediate thrust arcs in Mayer's variational problem
- L. M. ZIGANGAREYEVA and O. M. KISELEV: On outflow of a gas jet from a conical nozzle
- V. F. SANNIKOV: A simple expression for the Green's function of a uniform deep-water ship-wave problem
- V. V. RYNDINA: Some problems of uniqueness of the reconstruction of Brunt-Väisälä frequency from dispersion curves
- A. G. PETROV: Development of the flow of viscous and visco-plastic media between two parallel plates
- V. M. ALEKSANDROV and V. B. ZELENTSOV: Asymptotic methods in an axisymmetric dynamic unsteady contact problem for an elastic half-space
- D. A. POZHARSKII: The three-dimensional contact problem for an elastic wedge when the friction forces are taken into account
- S. Ye. ALEKSANDROV and R. V. GOL'DSHTEIN: Rigid fibre pull-out from an elasto-plastic matrix
- I. V. PANFEROV: The thermal symmetrical mixed problem for a transversally isotropic elastic layer
- M. A. GREKOV and N. F. MORÓZOV: On circular equilibrium cracks
