

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS
CONTENTS OF NEXT ISSUE
Volume 64, No. 6, 2000

D. D. IVLEV (70th birthday)

I. M. ANAN'YEVSKII: Control of a fourth-order linear system subject to mixed constraints

Yu. K. ZOTOV: Controllability and stabilization of programmed motion of a transport robot

N. V. SMIRNOV and T. Ye. SMIRNOV: Synthesis of multiprogrammed control for bilinear systems

V. N. KOSHLyakOV: On the structural transformations of non-conservative systems

V. V. KOZLOV: Two-link billiard trajectories: extremal conditions and stability

A. A. MAILYBAEV and A. A. SEYRANIAN: On boundaries of the parametric resonance domain

N. B. GRIGOR'YEVA: The stability of the equilibrium of ellipsoids of a rotating liquid

V. Yu. LYAPIDEVSKII: Roll wave patterns in two-layer flows

A. B. ZIMIN, V. A. KALINICHENKO, S. Ya. SEKERZH-ZEN'KOVICH and I. K. SHINGAREVA:
Excitation of Tsunami waves by low-frequency non-stationary point and distributed centres of dilatation

E. V. TEODOROVICH: On the effective conductivity of a randomly inhomogeneous medium

P. A. MAZUROV: The construction of dual variational principles of the theory of incompressible fluid seepage in some deformable complex media

O. SIPOV: Generalization of the functionally invariant solutions method for dynamic problems of the plane elasticity of anisotropic media

A. G. KULIOKOVSKII and A. P. CHUGAINOVA: On quasitransverse shock wave stability in anisotropic elastic media

V. A. ROMASHCHENKO: Anomalous reflection of non-classical waves from ultrathin obstacles

A. S. BRATUS' and V. P. POSVYANSKII: On optimum shape of a bent beam

I. N. DASHEVSKII and V. E. SHKLOVER: Problems of compliance maximization of curvilinear bars

L. A. MAKSIMOVA: A limiting state of a layer compressed by rough plates
