

# JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

## CONTENTS OF NEXT ISSUE

### Volume 66, No. 3, 2002

- A. S. ANDREYEV and C. RISITO: On the stability of generalized steady motion
- F. D. BAIRAMOV and M. Yu. SAFRONOV: Stability of distributed systems with concentrated loading
- V. F. ZHURAVLEV: Invariant normalization of non-autonomous Hamiltonian systems
- O. V. KHOLOSTOVA: On internal resonance in an autonomous Hamiltonian system close to the system with a cyclic coordinate
- O. N. KIRILLOV and A. P. SEYRANIAN: Restructuring of characteristic curves in circulatory systems
- G. A. LEONOV: On localization of attractors of Lienard's equation
- V. N. SHASHIKHIN: Controllability of interval dynamical systems
- Yu. M. ZABOLOTNOV and V. V. LYUBIMOV: Non-linear resonance evolutionary effects in the motion of a rigid body about a fixed point
- G. V. GORR and Yu. K. UZBEK: On integration of the Poisson equations in the case of three linear invariant relations
- N. Z. DOSAYEV and V. A. SAMSONOV: Stability of rotation of a heavy body with a viscous filler
- V. S. GALKIN and V. A. ZHAROV: On transport properties of gases in Burnett's approximation
- E. V. TEODOROVICH: Improved perturbation theory method for description of the effective permeability of a randomly heterogeneous medium
- M. G. ZHUCHKOVA and D. P. KOUZOV: Transmission of a bending-gravitational wave through a rigid fixing in a floating plate
- V. A. KUCHER and V. A. PUPYREV: Integral equations for Saint-Venant and antiplane strain problems
- A. A. GOUSENKOVA: The potential functions method in problems of the theory of elasticity for bodies with a defect
- Ye. V. DIDENKO and Yu. A. USTINOV: Critical modes of vibration of a transversely inhomogeneous plate of periodic structure
- A. V. BELOKON', A. V. NASEDKIN and A. N. SOLOV'YEV: New schemes of finite element dynamic analysis for piezoelectric devices
- I. I. ARGATOV and S. A. NAZAROV: Energy release for kinking of a crack in a plane anisotropic body
- J. R. OCKENDON and S. D. HOWISON: Kochina and Hele-Shaw in modern mathematics, science and industry
