

# JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

## CONTENTS OF NEXT ISSUE

### Volume 66, No. 4, 2002

- L. A. GALIN (90th birthday)
- V. F. ZHURAVLEV: On a model of a snake's motion
- O. V. KHOLOSTOVA: On periodical motions of a non-autonomous two-degree-of-freedom Hamiltonian system under parametric resonance of the fundamental type
- I. M. ARKHIPOVA: Steady motion of a rigid unbalanced rotor supported in non-linear elastic bearings
- E. K. KOSTOUSOVA: On external polyhedral estimates for attainability sets of systems with bilinear uncertainty
- S. M. ZEN'KOVSKAYA and A. L. SHLEYKEL': The effect of high-frequency vibration on the onset of Marangoni convection in a horizontal fluid layer
- O. B. KHAIRULLINA: On the initial stage of collapse of symmetric gas prisms
- V. A. KOVALEV: Matching of asymptotic models in scattering of acoustic waves by an elastic spherical shell
- Yu. N. SANKIN and A. Ye. TRIFANOV: Axially symmetric vibrations of a shell in the form of a surface of revolution under sudden loading
- G. A. KAPANADZE: Boundary-value problems of bending of a plate for a doubly connected domain bounded by broken lines
- E. I. GRIGOLYUK and Ye. A. LOPANITSYN: Axisymmetric postbuckling behaviour of shallow spherical shells
- V. M. ALEKSANDROV and D. A. POZHARSKII: Inclusion problem for a three-dimensional elastic wedge
- V. M. ALEKSANDROV and F. V. KUDROVA: The exact solution of a periodic contact problem for an elastic layer taking friction and wearing effects into account
- I. I. ARGATOV: The indentation of a punch with the rounded edge into an elastic halfspace
- R. D. BANTSURI and N. N. SHAVLAKADZE: The contact problem for an anisotropic wedge with elastic fastener of variable rigidity
- V. S. NIKISHIN: Axially symmetric contact problems for a two-layer elastic halfspace with annular circular crack on the boundary between layers
- G. Ya. POPOV: Exact solution of certain mixed problems of the uncoupled thermoelasticity theory for a truncated circular hollow cone with a cutout among generatrix
- D. BARDZOKAS and M. I. FIL'SHTINSKII: Antiplane electroelasticity problem for a cylinder with a tunnel crack that is excited by an arbitrary system of surface electrodes
- V. N. RUBANOVSKII: Obituary
