

**JOURNAL OF APPLIED MATHEMATICS AND MECHANICS**  
**CONTENTS OF NEXT ISSUE**  
Volume 67, No. 6, 2003

- E. I. GRIGOLYUK (80th birthday)
- E. I. GRIGOLYUK and Ye. A. LOPANITSKII: Asymmetric post-buckling behaviour of shallow spherical shells
- D. V. BOIKO, L. P. ZHELEZNOV and V. P. KABANOV: Non-linear deformation and stability of elliptical cylindrical shells under transverse bending
- G. M. KULIOKOV and S. V. PLOTNIKOV: Contact problem for the geometrically non-linear Timoshenko-type shell
- Yu. V. LIPOVTSEV: The statement and algorithms of solving transient axisymmetric boundary-value problems of thermoelasticity for shells
- P. Yu. NOSATENKO and Yu. Yu. SHIRSHOV: Three-dimensional stress-strain state of reinforced cross-ply shells of revolution under heating
- Ya. I. BURAK and G. I. MOROZ: Variational formulation and analysis of initial boundary-value problems of the non-linear theory of plates using the energetic approach
- Ye. A. LOPANITSYN: Non-linear static analysis of orthotropic annular and annular sector plates
- I. T. SELEZOV: Some degenerate and generalized wave models of elastodynamics and hydrodynamics
- F. N. SHKLYARCHUK: An approximate method for calculating vibrations of a liquid in inclined elastic containers and channels
- L. A. FIL'SHTINSKII: Homogeneous solutions of Dirichlet's boundary-value problem for an anisotropic layer
- V. I. MAMAI: The applicability of a shear delamination model
- V. M. KORNEV: Fracture of brittle and ductile crystals. Strength and deformation criteria
- Yu. G. BALAKIREV: Some features of the construction of adjusting functions when analysing free vibrations of mechanical systems by Bubnov's method
- A. N. DANILIN, E. B. KUZNETSOV and V. I. SHALASHILIN: Implicit algorithms of solving the Cauchy problem for the dynamic equations of mechanical systems
