

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS CONTENTS OF NEXT ISSUE Volume 68, No. 6, 2004

- V. V. KOZLOV: The dynamics of variable systems and Lie groups
- V. N. KOSHLIYAKOV and V. L. MAKAROV: The stability of non-conservative systems with degenerated matrices of dissipative forces
- V. I. KALENOVA, V. M. MOROZOV and M. A. SALMINA: The stability and stabilization of steady motions of non-holonomic mechanical systems of a specific class
- G. A. LEONOV: Criteria of instability in the first approximation for time-dependent linearizations
- I. I. BLEKHMANN and N. P. YAROSHEVICH: The extension of the applicability of the integral criterion (extreme property) of stability in synchronization problems
- Yu. G. MARTYNENKO: The theory of generalized Magnus effect for non-holonomic mechanical systems
- A. A. BUROV: The “restricted” statement of the problem of motion of a heavy rigid body
- Ye. K. UZBEK: The new solution of Kirchhoff’s equations of the problem of gyrostat motion under potential and gyroscopic forces
- S. V. CHAIKIN: Stability of the family of non-trivial equilibrium orientations to the attraction centre of a gyrostat with an elastic beam in a circular orbit
- N. V. DERENDYAYEV and I. N. SOLDATOV: Stability of steady motions of the rotor system with a fluid based on a discrete model
- A. V. KARAPETYAN, V. A. SAMSONOV and T. S. SUMIN: Stability and branching of permanent rotations of a liquid filled solid body
- V. S. ASLANOV and A. V. DOROSHIN: The motion of a system of coaxial bodies of variable mass
- V. G. VIL’KE and I. F. KOZHEVNIKOV: The rolling of a wheel with a reinforced tyre along a plane with slip
- P. M. BELOTSEKOVSKII: Interaction between equi-spaced wheels in an infinite row, uniformly moving over a railtrack
- A. B. KISELEV, A. B. KOKOREVA, V. F. NIKITIN and N. N. SMIRNOV: Mathematical modelling of a traffic flow on traffic-controlled roads
- D. V. GEORGIYEVSKII and B. Ye. POBEDRYA: The number of independent compatibility equations in solid mechanics
- D. V. DOLGIKH and V. V. KISELEV: Solutions of transverse corrugation in the three-layer non-linearly elastic medium
