

**JOURNAL OF APPLIED MATHEMATICS AND MECHANICS**  
**CONTENTS OF NEXT ISSUE**  
Volume 69, No. 1, 2005

- L. D. AKULENKO: An extension of the averaging method for optimal control problems for non-linear oscillations
- S. G. KRYZHEVICH and V. A. PLISS: Chaotic modes of oscillations of a vibro-impact system
- M. S. YEFREMOV, A. Ye. POLYAKOV and V. V. STRYGIN: New tracking control algorithm for some mechanical systems
- G. V. MANUCHARYAN and Yu. V. MIKHLIN: Construction of homo- and heteroclinic trajectories in non-linear systems
- L. M. ZUBOV and D. M. SHEIDAKHOV: The effect of torsion on the stability of a stretched elastic cylinder
- V. I. EROFEYEV and O. A. SHESHENINA: Waves in a homogeneous gradient-elastic medium with surface energy
- E. I. SVESHNIKOV: Riemann waves in elastic media with small cubic anisotropy
- A. A. PESHKOV and Yu. A. USTINOV: Ultrasonic scanning of an acoustic medium by a two-layer plate at the critical frequency
- A. G. KOLPAKOV: Design of a beam with controlled force elements
- I. A. SOLDATENKOV: The relaxation of shear contact stress in problems with sliding friction
- D. S. KONDRAT'YEV, P. V. STESENKO and I. V. SHIRKO: Elastic-plastic deformation and limit equilibrium of granular media
- A. G. RAMM and Ye. I. SHIFRIN: A symmetry problem for planar crack subject to normal cleavage
- A. M. LIN'KOV: On the size of a fracture process zone and the propagation velocity of a displacement discontinuity
- V. M. ALEKSANDROV and B. I. SMETANIN: Longitudinal crack in a prestressed thin elastic layer with free edges
- I. Yu. TSVELODUB: On the fracture of physically non-linear inhomogeneous media with stress relaxation conditions in inclusions
- Fifth International Symposium on Classical and Celestial Mechanisms
- News item
