

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS
CONTENTS OF NEXT ISSUE
Volume 69, No. 5, 2005

- N. I. YEFREMOV, A. N. KRAIKO and K. S. P'YANKOV: Minimum drag forebodies of revolution given gabarites and volume
- A. M. YELIZAROV and D. A. FOKIN: Exact solutions of some optimization problems in aerodynamics
- G. Ye. YAKUNIN: Optimal shapes of bodies moving in a medium taking friction into account
- V. I. GRABOVSKII: Optimum design of a porous slider by load carrying capacity or static stiffness
- I. I. VIGDOROVICH: Unified profiles of velocity and Reynolds stress in a turbulent boundary layer on the plate with blowing and suction
- S. Yu. DOBROKHOTOV, B. TIROZZI and A. I. SHAFAREVICH: Cauchy–Riemann conditions and localized asymptotic solutions of the linearized shallow water equation
- S. V. MANUILOVICH: On secondary perturbation of Benjamin waves
- O. V. MOTYGIN: Frequency estimates for modes of fluid motion trapped near submerged cylinders
- L. I. RUBINA: On the characteristics and solutions of the one-dimensional unsteady equation of fluid flow in a porous medium
- O. V. VOINOV: Generalization of the problem of viscous fluid flow in a corner on the flow with curved boundaries
- A. P. BLINOV: On the form of a capillary liquid equilibrium in a uniform force field
- S. P. BAKANOV: On the thermophoresis of bodies in gases
- V. N. PAIMUSHIN and V. I. SHALASHILIN: On square approximations of the deformation theory and problems of constructing improved versions of geometrical non-linear theory of multilayer structural elements
- I. D. KOCHETKOV and N. N. ROGACHEVA: Contact interaction of a piezoelectric actuator with a semi-infinite elastic solid
