Editorial

This issue contains, in addition to original research articles, the first contributed review article on timely topics in carbohydrate chemistry. The review, "Monosaccharides with Phosphorous in the Sugar Ring", by Z. J. Witczak and R. L. Whistler, provides an excellent summary and update on an interesting class of sugars. This review, and others to follow in future issues, are designed to highlight active but relatively recent research areas in carbohydrate chemistry. Review article manuscripts or suggestions for review article topics should be sent to one of the editors.
