Editorial

Revised Instructions for Manuscript Preparation

The Instructions for Preparation of Manuscripts For Direct Reproduction found at the end of this issue are recently revised instructions. They are similar to the original instructions but have been clarified and standardized in several sections. However, the Editors are well aware that following instructions that contain so much detail is not an easy task. To that end a booklet entitled "Instructions for Preparation of Manuscripts for Direct Reproduction" has been prepared and copies are now available, free of charge, from any of the Editors. A significant advantage in using the booklet is that it contains "Model Manuscripts" which clearly illustrate points made in the written instructions. Diligent use of the booklet with its "Model Manuscripts" results in manuscripts that are much easier to referee and edit. The ultimate result is faster publication of quality manuscripts.

The Editors strongly encourage authors to use the booklet in manuscript preparation and we look forward to receiving comments that will assist us further in improving the quality and utility of the journal.
