Editorial

The Editors and Editorial Board members of the *Journal of Carbohydrate Chemistry* are delighted to present to the readers of this journal, in these two issues, a collection of papers from participants at the *XVIth International Carbohydrate Symposium*, Paris, France, July 1-5, 1992. We particularly want to thank the authors whose manuscripts appear here for their fine efforts in preparing those manuscripts and showing great patience with the Editor during the final preparation stages for the issues.

With these Symposium Issues, as with those from previous International Carbohydrate Symposia we have been privileged to publish, some papers are drawn from research areas outside of the normal scope of the journal. Because of the very broad scope and importance of carbohydrate topics presented at these international symposia, we try to expand our subject coverage in order to better represent the chemical breadth of the meeting. We hope that we have been successful in publication of these issues.

The next *International Carbohydrate Symposium* will be held in Ottawa, Ontario, Canada, July 17-22, 1994. Plan to attend.

Finally, we thank the organizers of the Symposium for their cooperation in allowing us to go forth with these issues. That cooperation made all the difference.
